Unconsolidated statement of profit or loss	17
Unconsolidated statement of other comprehensive income	18
Unconsolidated statement of financial position	19
Unconsolidated statement of changes in shareholders' equity	21
Unconsolidated statement of cash flows	22
Notes to the unconsolidated financial statements	24
Appendix - Supplementary financial statements and reports for the Croatian National Bank	142

Dear clients and business partners,

Business environment

In the wake of the exceptionally challenging 2020, deeply beset with problems of the Corona virus pandemic, in which the gross domestic product of the Republic of Croatia plummeted by more than 8%, a recovery of the economic activities that was recorded in 2021 should entail the expected growth of the gross domestic product by as much as 10.8%, according to the most recent forecast of CNB. After the initial technical difficulties in terms of production and distribution of the vaccines preventing the Corona virus infection and mitigating its negative consequences, the inoculation of the population, and flattening the curve of the epidemic in the Republic of Croatia and the neighbouring countries created the preconditions for a return of tourism. According to the data of the Croatian Bureau of Statistics, the cumulated number of tourist nights in 2021 decreased by 23% compared to the tourist record year 2019, with the drop of the arrivals of as much as 33%. Taking into consideration the forecast of the Croatian National Bank voicing their expectations that the pre-pandemic levels of economic activities would be reached already by the end of the year, they have foreseen a more moderate growth of the gross domestic product (by 4.1%) for the year ahead.

The economies of the surrounding countries shared the experience of the Croatian economy during 2020, given the adverse effects entailed by the Corona virus pandemic, primarily the economic lockdowns. Certain highly developed economies within the Eurozone proved to be resistant to shocks, hence the average drop in the GDP at the level of the Eurozone was 6.4%. The mass inoculation process aimed at preventing further spread of the Corona virus epidemic took off across the European Union in 2021, so much so that the plan of the European Commission for inoculation of the minimum of 70% of the population with the first dose of the vaccine was reached by the end of August. As for the recovery of the economy in the Eurozone, the European Commission anticipated a 5.3% growth. According to the data provided by the Croatian Bureau of Statistics, the recovery of the Croatian economy, same as the recovery of the neighbouring countries, triggered the upturn in the foreign trade. Thus, in the first eleven months of 2021 the export grew by 26.8%, whilst the import rose by 23.2% compared to the same period of the previous year.

The employment market was rather gloomy at the beginning of 2021, considering that certain economic sectors (primarily service industry) were heavily affected by the lockdown, which reflected in a relatively high unemployment rate of 9.8% or 165 thousand of the unemployed recorded in January. With the relaxation of the epidemiologic measures, and gradual opening of the economy, the unemployment rate started its downward trend that continued until September when it reached the lowest point that year: 7%, or 119 thousand people. As the tourist season waned, the demand for labour eased, causing the unemployment rate to rise to 7.4% in December, which translated into 126 thousand of the unemployed.

Due to modest demand for goods and services at the beginning of 2021, the inflation rate at annual level was -0.3%. As the economy started picking up again, the consumer-spending component of the gross domestic product became more prominent, consequently causing the rise of the prices in general. Given that one of the negative ramifications of the pandemic on the global level was a disturbance in the supply chains, the supply contracted and triggered the growth of inflation. Along those lines, there was a trend of increasing inflation rate in Republic of Croatia throughout 2021, from -0.3 at annual level in January to 5.5% in December. The average inflation rate in 2021 was 2.6%, whilst for 2022 the Ministry of finance anticipate the average rate of 3.5%.

Business environment (continued)

After the extreme pressure that was imposed on public finances in 2020 reflected in both: lower revenue budget (primarily lower VAT) and higher expenditure in the form of the fiscal support package to the real economy sector aimed at job preservation in the pandemic, in 2021 the public finances recovered and stabilised. Due to a sharp decline of the gross domestic product, and an increase of the budget deficit at the end of 2020, the budget deficit to gross domestic product ratio spiked at 8%, whilst at the same time the public debt to gross domestic product ratio surged over 90%. Considering the economic recovery in 2021, accompanied by the stabilisation of the budget revenues and expenditures, the budget deficit is expected to be at 4% of the gross domestic product. According to data published by the CNB at the end of 2021, the ratio of public debt to gross domestic product at the end of September was 82.4% compared to 84.7% in the same period in 2020. Mid-November 2021 the Fitch Ratings upgraded the credit rating of the Republic of Croatia to BBB with positive outlook, which is the best ever credit rating of the Republic of Croatia. In the report accompanying the rating upgrade they stated that the effects of the structural reforms had become visible, which is expected to be additionally supported by Croatia's entry into the Eurozone, as the convergence should cut the transaction costs and decrease the currency risk for the local economic entities.

The Croatian National Bank continued implementing its expansive monetary policy during 2021, thus providing the necessary support to the economy in dire need for a recovery after the sharp downturn of the gross domestic product suffered the previous year. As for the monetary operations, the Croatian National Bank continued securing liquidity to the banking sector via regular short-term interventions in the money market. However, the banks were not interested at all because the system was brimming with liquidity already, in average equalling HRK 65.3 billion throughout the year. In addition, the Croatian National Bank carried out two fine-tuning exercises whereby it intervened in the local foreign exchange market in attempts to stabilise the EUR exchange rate. Owing to the fact that the Croatian National Bank maintained its exceptionally expansive monetary policy, the interest rates in the interbank market remained at all times low. In 2021 the banking sector eased the retail lending conditions at the beginning of the year, but simultaneously stiffened the corporate lending conditions.

The total assets of credit institutions equalled HRK 493 billion at the end of September 2021, which represented an increase of HRK 30.5 billion, or by 6.6% compared to the same period 2020. As for credit facilities, there was a notable increase of the total loans and advances by 6.4%, while the non-performing loans (NPL) dropped by 8.1%, consequently resulting in lower share of the non-performing loans (5.4% at the end of 2020 to 4.7% at the end of third quarter 2021). The operations of the credit institutions resulted in the profit of HRK 4 billion at the end of the third quarter of 2021, which represented an increase of 59.3% compared to the same period of 2020. The profitability indicators of the banking sector grew accordingly, as evident when comparing their levels at the end of third quarter 2021 and 2020 year-end. For example, the return on assets (ROA) increased from 0.8% to 1.1%, whilst the return on equity (ROE) rose from 5.5% to 8.3%.

The banking sector remained very well capitalised in 2021. Thus, the total banking system capitalisation rate was at 25.6% at the end of September 2021, where all the credit institutions had the total capital rate higher than the floor rate of 8%. Measured by the liquidity coverage ratio (LCR), the liquidity of the banking system equalled 206.9% at the end of September 2021, noting that all credit institutions met the set minimum liquidity requirements.

Operations and activities of OTP banka in 2021

The total assets of OTP banka d.d. as at 31 December 2021 amounted to HRK 49.5 billion, or 9.6% more than at the end of 2020. A growth of the total balance sheet was primarily generated by a growth of clients' deposits, in retail and corporate segments alike.

The retail deposits recorded a growth of 13.1%, with continued downward trend of the time deposits and a prominent surge in demand deposits due to low interest rates paid on time deposits and scarce investment options. A rise of corporate clients' deposits by 21% in the observed period was caused by the growth of demand deposits in both foreign and local currencies, and time deposits in local currency.

This inflow of deposits helped reduce the borrowings from financial institutions, primarily from the parent bank, and secured a more favourable liquidity position despite substantial increase in lending. The total loans to and receivables from clients grew by 9%, where lending to both retail and corporate clients expanded. As for retail lending, especially good results were achieved in housing loans, as evident in the increase of the market share by 157 basis points, to the level of 14% of the total market. The increase in the corporate lending segment reflected in the growth of the market share to 11% by the end of 2021.

Measured by the total assets, the market share of the Bank is just shy of 10%, securing it the solid fourth position among the credit institutions of the Republic of Croatia.

In addition to excellent results in terms of market shares, the Bank also performed very well in terms of total profit after tax, which amounted to HRK 631 million, or 151% more than total profit in 2020.

Although it can be largely attributed to lower provisions levels required for coverage of credit risk than the ones required the year before, riddled with loan moratoria, the mentioned result is a testimony to careful risk management, positive trends in credit operations and positive trends in business revenues.

Thus, the net fee income grew by 12.2%, primarily as a result of recovery of card operations and the fees charged to merchants, encouraged by a brighter economic outlook and a more successful tourist season than the one of 2020. The net interest income stagnated (increase of 0.3%) due to the fact that a significant growth in volume barely offsets the negative effect of the continuous scaling down of interest rates.

At the same time, the operations optimisation and efficiency improvement trend has continued, along with a 1.6% decrease in the total operating costs, which resulted in scaling down of the cost to income ratio by 100 basis points (down to 53.5%).

The Bank observed all the regulatory requirements throughout 2021, maintaining a strong liquidity and capital position, and fortifying its foundations for further growth.

Corporate social responsibility

OTP banka d.d. takes pride in the fact that corporate social responsibility is embedded into its business policy. As of this year, the Bank demonstrated its commitment to the responsible and transparent operations (ranging from loan approval to savings and risk management) and to the projects focused on contributions to the development of the communities it is immersed in, by joining the Croatian Business Council for Sustainable Development (HRPSOR).

The Banker magazine, with a 95-year long tradition that guarantees a critical and comprehensive evaluation of business results, progress, and overall activities of financial institutions in their respective areas, awarded OTP banka d.d. the Bank of the Year Award 2021 in Croatia for its business operations, customer relations and contribution to the society in general.

A project of a complete integration of environmental, social and governance (ESG) standards into the business strategy, policies and risk management has been initiated at the level of the Bank. The integration of the sustainability principles also implies contribution to the UN sustainable development goals in all segments. This year the Bank prepared its Sustainability Report for the year 2020.

OTP is the first bank in Croatia that uses own solar power sources from the solar power stations mounted on the roofs of its head office buildings in Zadar, Dubrovnik and Pula. On top of that, the Bank financed a public electric car charging station. Through its "Green light to green living" programme it has provided modern waste management systems in its business buildings, thus fostering the practices of cutting down on the use of plastic in its everyday operations.

Since October 2021, OTP banka d.d. has switched to the power generated exclusively from renewable sources. Namely, the Bank concluded the contract with HEP Opskrba whereby it undertook to go completely green by using a unique product created by HEP Opskrba called ZelEn, where the earnings from such sale of green energy are channelled to energy efficiency projects and development of renewable sources.

The Bank has been contributing to better schooling conditions for students nationwide, in cooperation with local communities, through its programme "Green light to knowledge" that has been running for 12 consecutive years now. In the academic year 2020/2021, the project for granting scholarships to students of lower financial standing has been realised in partnership with the towns of Split, Zadar, Sisak, Buzet and Biograd na Moru, the municipalities of Župa dubrovačka, Bilje, Jakšić, Nuštar, Lanišće, Barban and Pićan, the University of Zadar, and the charity of the Dubrovnik Diocese, which means that the Bank, as a partner, joined the existing grant programmes for this academic year. The scholarships were awarded following the invitation to tenders, and the main criteria included financial and social standing of the applicants, and their academic performance. Over the last twelve years the Bank set aside in excess of seven million kunas for this programme.

Wishing to foster excellence in sports at the Croatian universities, OTP banka d.d. once again decided to award additional scholarships to four full time students who, apart from their academic accomplishments, have also achieved noteworthy results in their chosen sports.

Upholding another tradition for the eleventh year running, OTP banka d.d. invited tenders for donations intended for projects within four different categories: the young, education and science; protection of cultural, historic and traditional heritage and environmental protection; humanitarian projects, and sports. We received several hundred applications from all parts of Croatia, out of which our commission chose 37 projects focusing on improvement of the quality of life in the relevant communities.

Over the last eleven years, OTP banka d.d. has donated HRK 4.2 million and helped in the implementation of more than 400 quality projects critical for the development of the related communities and the society as a whole.

In addition, with its partner MasterCard, OTP banka d.d. initiated one of the most significant donation schemes for public health institutions in 2020, intended to help two Croatian hospitals in procuring necessary equipment for children's wards each year.

All clients of OTP banka d.d. holding Mastercard® cards can join this scheme by activating the OTP RoundUp service, which enables them to simply "round up" their bills when shopping, and thus contribute to this worthy cause. For example, if your bill totals HRK 18.50, it will be rounded up to HRK 19.00, whereas the HRK 0.50 difference is paid directly to the donation account set up exclusively for this purpose. The largest amount donated with a single bill is HRK 0.99. At the beginning of each donation cycle, OTP banka and MasterCard jointly credit HRK 1 million to this donation account.

Corporate social responsibility (continued)

The first two hospitals that benefited from this programme were the General Hospital of the Šibenik and Knin Country (Children's Ward) and the Zagreb Clinical Hospital (Neonatology Ward of the Gynaecology and Obstetrics Institute, also known as "Petrova"), whilst in 2021 two donations of HRK 810,5 thousand each were granted to the Split Clinical Hospital (Paediatric Cardiology Ward) for the ultrasound device, and to the Children's Hospital at Klaićeva in Zagreb for refurbishment of the accommodation facilities at the Children's Surgery Ward.

The RoundUp programme continues in 2022 as a declaration of OTP banka's commitment to galvanising affirmative social actions.

Repurchase of own shares

OTP banka d.d. is 100% owned by OTP bank Nyrt and did not repurchase its own shares in 2021.

Subsidiaries of OTP Banka d.d.

Several companies in full or partial ownership of OTP banka d.d. were established in the Republic of Croatia. In cooperation with subsidiaries, the Bank develops and provides all groups of services and products that can support banking operations with individuals and legal entities.

OTP Leasing d.d.

OTP Leasing d.d. was established by Merkantil Bank Zrt, Hungary, which specialises in lease operations within OTP Group, in 2006.

Having initially owned 10% of the shares in the company, in 2019 OTP banka concluded the Share Sale and Assignment Agreement, and thus became the majority owner of the company holding 60% of the shares.

The main activity of the company are financial and operating lease.

The company has a wide sales network with branches in Zadar, Split, Pula, Rijeka, Zagreb, Varaždin, Slavonski Brod and Osijek. Any lease arrangements can be concluded also in the OTP banka branch network, which greatly contributes to the level of availability of the services nationwide.

The company fully owns SB Leasing d.o.o., with the registered activities of operating and financial lease, and the activities directly and indirectly related to lease. SB Leasing d.o.o. was founded in 2007, and is currently undergoing the liquidation procedure.

In the middle of the year, the Company became an industry leader in the number of newly concluded contracts with 20% market share.

According to the size of the total portfolio, OTP Leasing together with Erste & Steiermarkische S-Leasing d.o.o. shares second place with a market share of 16%. As at 31 December 2021, the Company's net profit amounted to HRK 36.5 million and increased by 17.2% compared to 2020. The company's assets in 2021 increased by 5% and amounted to HRK 2.8 billion.

OTP Invest d.o.o.

OTP Invest d.o.o. was established in 1997 in Zagreb, and is presently owned by OTP banka (81.70 %) and OTP Alapkezelő Zártkörűen Működő Részvénytársaság, Hungary (18.30%).

The basic activity of the company is founding and management of UCITS funds and alternative investment funds.

The open investment UCITS funds managed by OTP Invest d.o.o. are OTP Start Fund, OTP e-start Fund, OTP SHORT-TERM BOND Fund, OTP ABSOLUTE Fund, OTP Balanced Fund, OTP MERIDIAN 20 Fund, OTP Index Fund, OTP MULTI 2 Fund, and OTP MULTI USD Fund.

During 2021, the company bounced back from the adverse impact of the COVID pandemic of 2020, and its 2021 profit was close to zero. The Bank injected HRK 1.7 million of capital into the company in 2020. Expectations of better results in the upcoming period are based on technological improvements (such as support to investor /client suitability assessment via mobile channels), and process optimisations (more licenced employees, additional training).

Subsidiaries of OTP Banka d.d. (continued)

OTP Nekretnine d.o.o.

The company OTP Nekretnine d.o.o. was founded in Zadar in 2000, and is fully owned by the Bank. The basic activities include rental and real estate management, appraisal of real properties and chattels, real estate agency services, development projects and consultancy services.

The company operates through its two branches (Zagreb and Zadar).

The company is a sole owner of Cresco d.o.o., a special purpose vehicle founded in 2008, and the activities of which include acquisition of real properties at auctions organised as a part of enforcement and bankruptcy proceedings, sale of such properties, and real estate agency services. Consolidated profit of OTP Nekretnine d.o.o. for 2021 amounted to HRK 7 million (2020: 5.2 million) which is an increase compared to 2020 by 35%.

Georg d.o.o.

Georg d.o.o. is a company founded in Zagreb in 1992. The Bank became the majority owner when it bought the controlling interest of 76% in 2021. The basic activities of the Company are advisory services regarding grants awarded by the European Union.

Risk management

In order to establish an adequate risk management process, the Bank has adopted suitable strategies, policies, procedures and the risk management (assumption) framework, which are updated regularly and the application of which is monitored continuously by the Board and the Supervisory Board, through the established internal controls system.

During 2021 the Bank paid special attention to management of the risks it was or could have been exposed to, using the procedures and methods for establishing, measuring, assessing, containing and monitoring of such risks, including the reporting thereon.

Among other methods, the significant risks are identified by:

- Risk control self-assessment (RCSA)
- Scenario analysis
- Key risk indicators
- Business impact analysis (BIA).

The RCSA and scenario analysis are carried out once a year, in cooperation with the senior management and the concerned control functions, whilst the key indicators are monitored and revised on quarterly basis. The business impact analysis is updated at least once a year.

Risk identification is also carried out on the occasions such as outsourcing, introducing of new products and implementing of significant business changes.

For more details on risk management please see Notes 33, 34, 35, 36 and 37 of the Annual Report.

Risk management (continued)

The most critical risks the Bank was exposed to:

Credit risk

The Bank is exposed to credit risk, which is the risk that the counterparty will not be able to settle in full the amounts owed as they fall due. The Bank structures the levels of the credit risk it undertakes by placing limits on the amount of risk accepted in relation to a single borrower, or a group of borrowers, industry segments or products. The Bank monitors the risks, reviews and adjusts them regularly. The exposure to the credit risk per all assets is limited by the carrying amount of each asset reported in the statement of financial position. The exposure to the credit risk of derivatives that relate to foreign currencies is equal to the sum of the positive current market value of the underlying contract and the potential exposure to the counterparty risk. Additionally, the Bank is exposed to the credit risk per off-balance-sheet items, which include assumed commitments under granted but not utilised credit, issued guarantees and letters of credit.

The Bank manages its exposure to the credit risk by regular analysis of the ability of the borrowers and potential borrowers to repay interest and principal, by revising the credit limits where necessary, and to a certain extent also by acquiring collateral, and corporate and personal guarantees.

Market risk

Market risk is the effect of external influences on the value of positions in the Bank's portfolio due to changes in prices or fluctuations in the financial markets. By that definition, the market risk consists of: currency risk, interest rate risk and price risk.

The basic objective of the market risk management in the Trading Book is to make profit by taking advantage of fluctuations in exchange rates and interest rates, which means limiting losses that may result from their adverse fluctuations so as not to endanger the profitability and operation of the Bank.

Liquidity risk

The cash flow management policy aimed at maintaining a balance between cash receipts and expenses is part of the Bank's wider asset and liability management policy. To ensure a satisfactory level of liquidity reserves, the Bank consistently implements the cash flow monitoring and planning process and anticipates future liquidity needs taking into account changes in the Bank's economic, legislative and other circumstances. This planning involves identifying known, expected and potential cash outflows and developing strategies to meet the Bank's liquidity requirements in certain currencies. It is important to emphasize that, when managing its liquidity risk, the Bank seeks to ensure the currency matching of the liquid assets' portfolio with the currency distribution of its net liquidity outflows.

Operational risk

Operational risk is the risk of loss resulting from inadequately defined or improperly executed business process, human error, inappropriate system operation, or from external factors, including legal risk.

The Bank's activities in the operational risk management field are in line with the applicable regulations and good operational risk management practices, and are regularly revised to reflect any changes therein.

The Bank's Management Board believes that, by observing all adopted measures, it manages the mentioned risks adequately and productively.

Plans for 2022

Bank's plans for the year 2022 have been made in accordance with the forecasts for macroeconomic indicators and expectations for further development and expansion of the banking market, on the presumption that the business environment will go back to normal.

The retail banking segment will focus its activities in 2022 on further growth of the client portfolio, better customer experience on all our communication and sales channels, enhancing of credit products and further digitalisation of business operations. Simultaneously with the processes of branch network optimisation and digital channels development, the plan envisages improvement of the business processes in branches aimed at significant advance of the quality of service and client satisfaction, whilst remaining committed to the fulfilment of the new loan sales plan. Appreciating the specific circumstances of the Croatian market in terms of credit products, special focus will be put on service quality as the competitive edge bringing high client satisfaction levels, all in line with the strategy of the Bank.

The 2022 plans for the corporate banking segment assume that the business activities will go back to normal, and that the effects of COVID pandemic on the business operations will taper off. Same as in 2021, the success of the operations will largely depend on the results of the tourist season. Taking that into account, quality of service model, client satisfaction, speed of responding to their requests, and nature and status of the business relationship enabling timely recognition of client's needs remain an everlasting condition precedent to success. In addition, further digitalisation across key segments remains of the utmost importance.

Another factor that must be weighed in this year is certainly the Croatian EUR changeover plan with the changeover date scheduled for 1st January 2023. Namely, the preparation for joining the monetary union requires not only alignment of the processes and operations, but also affects the strategic determinants and actions of the Bank. To that end, a whole set of activities has been initiated, and will continue throughout 2022.

Recognising clients' needs when designing products and services, under the assumption of normalisation of life and economy, will contribute to the planned scaling up of the operating income in 2022. Simultaneously with the mentioned activities, we expect improvement of the internal efficiency, whilst keeping the risk costs at bay, which should create preconditions for even better business results.

Research and development

Taking into account the requirements of product research and development, the activities of the OTP banka d.d. are primarily related to the research of the financial market and the design of appealing and competitive financial products and solutions predominantly tailored to suit the clients' needs, whilst remaining true to the nature of its business activities. This will continue to be the area of paramount importance where the Bank will invest even more funds in order to provide top-notch services to meet the increasingly more demanding market standards.

We will continue monitoring the activities of our clients and keeping an ear on the ground for any needs of our community, as a sign of our dedication and commitment to social responsibility.

I would like to take this opportunity, on my own behalf and on behalf of the Board and the entire OTP Group, to extend thanks to our customers and business partners for the trust shown. Our employees once again showed that they truly share the values advocated by OTP banka. They deserve special thanks for their efforts, **efforts, understanding and courage to face all the changes that we witnessed over the past year.**

Yours faithfully,
Balázs Pál Békeffy
President of the Management Board

Responsibility of the Management for the preparation of annual financial statements

The Management Board of the Bank is required to prepare financial statements for each financial year, to give a true and fair view of the financial position of the Bank and of the results of its operations and cash flows, in accordance with statutory accounting requirements for banks in the Republic of Croatia, and is responsible for maintaining proper accounting records to enable the preparation of such financial statements at any time. The Management Board has a general responsibility for taking such steps as are reasonably available to it, to safeguard the assets of the Bank and to prevent and detect fraud and other irregularities.

The Management Board is responsible for selecting suitable accounting policies to conform with applicable accounting standards and then apply them consistently; making judgements and estimates that are reasonable and prudent; and preparing the financial statements on a going concern basis unless it is inappropriate to presume that the Bank will continue in business.

The Management Board is responsible for the submission of the Bank's annual report, which includes the annual financial statements, for acceptance to the Supervisory Board. If the Supervisory Board approves the annual financial statements, they are deemed confirmed by both, the Management Board and the Supervisory Board.

The Management Board is responsible for the preparation and content of the Management Report and the rest of other information, in accordance with the provisions of the Accounting Act (Official Gazette 78/2015, 134/2015, 120/2016, 116/2018, 42/2020, 47/2020).

Financial statements, as well as the Schedules prepared in accordance with the Decision of the Croatian National Bank on the Structure and Content of the Annual Financial Statements of Credit Institutions (Official Gazette 42/2018, 122/2020 and 119/2021), were authorised by the Management Board on 11 March 2022 and submitted to the Supervisory Board for acceptance. To confirm this, the financial statements have been signed by authorized persons, as follows.

For and on behalf of OTP banka d.d.:

INDEPENDENT AUDITOR'S REPORT

To the Shareholder of OTP banka d.d.

Report on the audit of the financial statements

Opinion

We have audited the financial statements of OTP banka d.d. ("the Bank"), which comprise the statement of financial position as at 31 December 2021, income statement and the statement of other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Bank as at 31 December 2021 and of its financial performance and its cash flows for the year then ended in accordance with statutory accounting regulation as applicable for banks in Republic of Croatia.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report.

We are independent of the Bank in accordance with the International Ethics Standards Board of Accountants' (IESBA) International Code of Ethics for Professional Accountants, including International Independence Standards (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Key Audit Matter	How we addressed Key Audit Matter
<p>Determination of expected credit losses</p> <p>See Note 16 Loans and advances to customers and Note 2.12 Financial risk management policies</p> <p>Determination of expected credit losses represent management’s best estimate of the expected credit losses within the loan portfolios at the reporting date.</p> <p>Assessment of appropriate staging of exposures depends mostly on triggers (“trigger events”) identified by management as indicators of significant increase in credit risk of customers and impairment respectively. These triggers are subject to high level of judgement of the Management.</p> <p>Impairment provisions for expected credit losses require use of complex models (depending on the elements of the information system) and significant judgment of the Management Board and include high degree of subjectivity in estimating future cash-flows and timing of recoverability.</p> <p>COVID-19 pandemic also affects the estimates due to significant volume of given moratoriums as well as uncertain economic outlook, which resulted in more complex assessment of this effect onto expected credit losses.</p> <p>Additionally, regulator and market are focusing on exposures as they represent core business of the bank and provisioning of the loans is significantly affecting the result of the bank.</p> <p>This area is determined to be a key audit matter as the determination of the appropriate amount of impairment losses requires application of significant judgement and use of subjective and complex assumptions by management.</p>	<p>We obtained an understanding of the control environment and internal controls established by management in the process of measuring impairment provisions for expected credit losses. With the assistance of IT specialists, we assessed the design and tested the operating effectiveness of the controls, including the quality of underlying data and systems.</p> <p>We evaluated the design of controls over the calculation of individual impairments and tested the operational effectiveness of controls over the calculation of individual impairments of the Bank's portfolios, including the quality of the source data and the system.</p> <p>With the assistance of credit risk specialists, we assessed the methodology developed to calculate loan loss provisions under IFRS 9, concentrating on such aspects as factors for determining a “significant increase in credit risk”, allocating loans to stages, appropriateness of models used for calculation of Stage 1 (A1) and Stage 2 (A2) allowances and portion of Stage 3 (B) allowances calculated on models (exposures below HRK 3 million) and estimation of key provisioning parameters.</p> <p>We evaluated matrices used in the calculation of probability of default (“PD”) and loss given default (“LGD”). Additionally, with respect to models, we understood and assessed how the current macroeconomic expectations are incorporated in the model as part of forward-looking information.</p> <p>We examined a sample of exposures and performed procedures to evaluate the adequacy of classification of exposures in stages (including but not limited to assessing the creditworthiness of clients, review of input parameters such as probability of default, testing of reported days past due, assessing adequacy of Early warning signals (“EWS”) and watch list status).</p> <p>Our audit procedures for individually significant exposures focused on measuring the impairment of individually significant credit exposures, including assessing whether historical experience</p>

	<p>is appropriate for estimating the amount of credit losses in the portfolio.</p> <p>On a sample of individually impaired credit exposures within a portfolio of individually significant exposures, we tested the assumptions used in identifying impairment and quantification including estimates of future cash flows, estimates of related collaterals and estimates of recovery on default and assessed whether the specific Croatian National Bank (“CNB”) provisioning requirements were reflected in the calculation. This also included taking into consideration the impact of forbearance.</p> <p>We also assessed adequacy of the disclosures in Note 16 Loans and advances to customers and Note 2.12 Financial risk management policies in the financial statements and if these are in line with the requirements of statutory accounting regulation as applicable for banks in Republic of Croatia.</p>
<p>Assessment of provisions for CHF litigation</p> <p>See Note 28 Provisions for liabilities and charges</p> <p>As of 31 December 2021, the Bank recorded provisions for litigation cases related to loans originally issued or indexed to Swiss Francs (“CHF”).</p> <p>The provision for litigation cases relates to loans that have been converted and to loans that have not been converted and are still denominated in CHF, including requests for nullifying loan agreements in full and requests for nullifying specific clauses of loan agreements.</p> <p>We focused on this area because there are considerable judgements and estimates in applying the relevant requirements to estimating both timing and size of outflows of economic resources required to settle the Bank’s obligations resulting from these specific litigation claims, given their inherent uncertainty and volume. Therefore, due to the significant judgment involved and considering total amount of provisions we consider this area as a key audit matter.</p>	<p>We obtained an understanding of the control environment and internal controls established by management in the process of assessment of provisions for CHF litigation.</p> <p>Also, we have inquired management in order to gain an understanding of the assumptions considered in determining the need to recognize and measure provisions for CHF litigation.</p> <p>We obtained an overview of the litigation claims against the Bank and the provisions recognized for these cases. We reconciled this information to the information provided in the financial statements and to the information received from independent legal advisers used by management.</p> <p>We obtained and reviewed the opinions and statements of independent legal advisers used by management and compared them to the information received from management in relation to the litigation claims.</p> <p>We obtained and reviewed the calculation of provisions for litigation and assessed whether the assumptions, on which the measurement of provisions is based, are based on relevant and available information from independent parties and the market.</p>

	We also assessed adequacy of the disclosures in Note 28 Provisions for liabilities and charges in the financial statements and if these are in line with the requirements of statutory accounting regulation as applicable for banks in Republic of Croatia.
--	--

Other matter

Financial statements of the Bank for the year ended 31 December 2020 were audited by another auditor who expressed an unmodified opinion on those statements on 15 March 2021.

Other information included in the Bank's Annual Report for year 2021

Management is responsible for the other information. Other information consists of the information included in the Annual Report which includes the Management report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the Other information including the Management report.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

With respect to the Management Report, we also performed procedures required by the Accounting Act. Those procedures include considering whether the Management Report includes the disclosures required by Article 21 of the Accounting Act.

Based on the procedures undertaken, to the extent we are able to assess it, we report that:

1. the information given in the enclosed Management report for the 2021 financial year are consistent, in all material respects, with the enclosed financial statements;

2. the enclosed Management report for 2021 financial year is prepared in accordance with requirements of Article 21 of the Accounting Act;

In addition, in the light of the knowledge and understanding of the entity and its environment obtained in the course of the audit, we are also required to report if we have identified material misstatements in the Management Report and Annual report. We have nothing to report in this respect.

Responsibilities of management and Audit Committee for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with statutory accounting regulation as applicable for banks in Republic of Croatia, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Audit Committee is responsible for overseeing the Bank's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with Audit Committee, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

In compliance with Article 10(2) of Regulation (EU) No. 537/2014 of the European Parliament and the Council, we provide the following information in our independent auditor's report, which is required in addition to the requirements of ISAs:

Appointment of Auditor and Period of Engagement

We were initially appointed as auditors of the Bank on 31 March 2021, representing a total period of uninterrupted engagement appointment of 1 year.

Consistence with Additional Report to Audit Committee

We confirm that our audit opinion on the financial statements expressed herein is consistent with the additional report to the Audit Committee of the Bank, which we issued on 11 March 2022 in accordance with Article 11 of Regulation (EU) No. 537/2014 of the European Parliament and the Council.

Provision of Non-audit Services

We declare that no prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No. 537/2014 of the European Parliament and the Council were provided by us to the Bank and its controlled undertakings within the European Union. In addition, there are no other non-audit services which were provided by us to the Bank and its controlled undertakings and which have not been disclosed in the financial statements.

Report on Regulatory requirements

In accordance with the Bylaw on the structure and content of the annual financial statements of credit institutions (National Gazette no 42/18) (hereinafter "the Bylaw") the Bank's management has prepared forms which are presented on pages 142 to 152, and which contain a statement of financial position as at 31 December 2021, income statement, statement on other comprehensive income, statement of changes in equity and cash flow statement for the year then ended together with reconciliation with the financial statements of the Bank ("financial information"). This financial information is the responsibility of the Bank's management and is, pursuant to statutory accounting regulation as applicable to banks in Croatia, not a required part of the financial statements but is required by the Bylaw.

Our responsibility with respect to this financial information is to perform the procedures we consider appropriate to conclude whether this financial information have been properly derived from the audited financial statements. In our opinion based on the procedures performed the financial information presented in the forms has been properly derived, in all material respects, from the audited financial statements of the Bank which were prepared in accordance with statutory accounting regulation as applicable for banks in Croatia as presented on pages 142 to 152 and are based on underlying accounting records of the Bank.

The partner in charge of the audit resulting in this independent auditor's report is Zvonimir Madunić.

1. GENERAL INFORMATION

The registered seat of the Bank is in Split, Domovinskog rata 61. The Bank is incorporated in the Republic of Croatia as a joint stock company and provides retail and corporate banking services. The Bank is registered at the Commercial Court in Split, with the registered share capital in the amount of HRK 3,993,754,800 as at 31 December 2021 (31 December 2020: HRK 3,993,754,800).

OTP banka d.d. (the Bank) is an authorized commercial bank operating in the Republic of Croatia and is the parent company of the OTP banka Group (the Group) in the Republic of Croatia.

The Bank provides a full range of banking services.

OTP banka Group is a group that provides a wide range of financial services that include insurance, leasing, fund management and other services, the most important of which are real estate management services.

The Bank's main areas of operation are as follows:

1. Acceptance of all types of deposits
2. Approval of loans to customers
3. Repurchase of receivables
4. Financial lease
5. Issuing guarantees
6. Trading for own account or client's account
7. Payment services
8. Services related to lending activities
9. Issuing and managing other payment instruments
10. Rental of safes
11. Mediation on the money market
12. Issue of electronic money
13. Conducting business related to the sale of insurance policies
14. Consulting legal entities on the structure of capital, business strategy, and provision of services related to business combinations and acquisition of shares and business interests
15. Investment related services and activities

Corporate governance code

OTP banka d.d. as a credit institution is well aware of the importance of a responsible and ethics-based conduct of corporate entities as an essential prerequisite for developing high-quality relations and loyal competition between business partners as well as for efficient functioning of the market. So, the Bank is developing its business activities and acting in accordance with the good corporate management practice. Moreover, it is trying, by way of its business strategy, business policy, key internal acts and business practice, to contribute to transparent and efficient business activities and better-quality relations with its business environment.

Bank's adequate corporate management includes:

- clear organisational structure with well defined authorisations and responsibilities;
- efficient activities for establishing, measuring and monitoring of the risks the Bank is or may be exposed to as well as related reporting activities;
- adequate internal controls mechanisms which also involve prudent administrative and accounting procedures, the strategies and the procedures for a constant assessment and review of the figures, the structure and the distribution of the internal capital required as coverage for current and future risks;
- fulfilment of general transparency requirements
- meeting the obligations and the responsibilities towards the shareholders, the employees and other interested parties;
- safe and stable business activities in accordance with law and regulations

The Corporate Governance Code is published on the Bank's official website and is available at the following link:

<https://www.otpbanka.hr/sites/default/files/doc/Kodeks%20korporativnog%20upravljanja.pdf>

1. GENERAL INFORMATION (CONTINUED)

Subsidiaries (continued)

Cresco d.o.o. (Real estate business) is 100% owned by OTP Nekretnine d.o.o.
SB Leasing d.o.o. in liquidation (Finance and operating leasing business) is 100% owned by OTP Leasing d.d.

In September 2020, the Bank conducted recapitalization of company OTP Invest d.o.o. in amount of HRK 1,7 million so the Bank increased its share in the company OTP Invest d.o.o. to 81.7%. Capital increase of OTP Invest d.o.o. is confirmed by the Decision of the Commercial Court in Zagreb on 23 September 2020.

In December 2020, the Bank signed a contract for the sale of 100% of shares in OTP osiguranje d.d. In 2020, the condition that the investment in OTP Osiguranje d.d. can be classified as Assets held for sale is met by conducting the agreement, thus the respective investment is presented in Note 24 Assets held for sale. The Agreement is completed on the 31 August 2021 after obtaining regulatory approvals from HANFA.

The Commercial Court has adopted a decision on the merger of OTP Savjetovanje d.o.o. with OTP Invest d.o.o. and this merger was registered in the Court Register on 16 November 2020.

The Management Board of the Bank d.d. issued a decision on 3 September 2019 to initiate the liquidation of the company OTP Aventin d.o.o. The Commercial Court in Zadar adopted a decision on the liquidation and a decision on the name change to Aventin d.o.o. in liquidation on 25 October 2019. The Commercial Court in Zadar adopted a decision on opening and closing bankruptcy proceedings of Aventin d.o.o. in liquidation on 26 August 2020. The decision become final and executory on 14 September 2020 thus the Company Aventin d.o.o. was removed from the Court registry.

In February 2021, the Bank conducted agreement for purchase of majority shares in consulting company Georg d.o.o. The transaction was finalized on 1 July after receipt of the regulatory approval from the Croatian National Bank and the Bank acquire the majority stake of 76% ownership which was confirmed by the entry in the register of the Commercial Court on 13 July 2021.

2. ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are summarised below.

2.1 Statement of compliance

These unconsolidated financial statements are compiled in accordance with the legal requirements for accounting for banks in the Republic of Croatia.

These unconsolidated financial statements represent the annual financial statements of the Bank, the parent company of OTP Banka d.d. group ("Group") consisting of the Bank and its subsidiaries (Note 19). Consolidated financial statements, which include the Bank and its subsidiaries (Note 19), will be prepared in accordance with the legal requirements for accounting for banks in the Republic of Croatia and have not yet been published. Consolidated financial statements will be published within the legal deadline. Note 1. *General information*, note 2.1. *Statement of compliance* and Note 2.19 *Investments in subsidiaries* describe accounting policy of recognition and measurement and other disclosures concerning unconsolidated subsidiaries.

Banks in Croatia are required to apply International Financial Reporting Standards adopted by the European Union ("IFRS") according to the accounting laws. In that sense, the legal accounting requirements of banks are based on IFRS and as prescribed by the Accounting Act (OG 78/2015, 134/2015, 120/2016, 116/2018, 42/2020 and 47/2020), together with the following regulations:

1. Credit Institutions Act (OG 159/2013, 19/2015, 102/2015, 15/2018, 70/2019 and 47/2020);
2. Croatian National Bank (CNB) subordinate legislation, which for 2021 period include, but are not limited to:
 - Decision on the classification of exposures into risk categories and the method of determining credit losses (OG 114/2017 and 110/2018);
 - Decision on the obligation to make provisions for litigations conducted against a credit institution (OG 1/2009, 75/2009 and 2/2010).

The Bank has applied the legal accounting requirements to all the years presented in these financial statements.

As of 1 January 2020, the requirement for maintaining a minimum of 0.8% of the total loss allowance for expected credit loss for exposures that are not in default status (Stage 1 and Stage 2) as prescribed in the transitional and final provisions of the Decision the classification of exposures into risk categories and the method of determining credit losses (OG 114/2017 and 110/2018) is abolished. Please refer to Note 10 *Net gains/(losses) from loss allowance from expected credit losses and provision*, which presents the financial effect of the termination of the above requirement as the most significant change in the legal accounting requirements in regard to previous periods. The impact on losses from expected credit losses on the basis of other minimum prescribed amounts in accordance with the aforementioned CNB Decision is also presented in Note 10.

Based on the Bank's assessment, the closing balances on 31 December 2021 as presented in the Financial Statements have been prepared in accordance with the legal requirements for accounting of banks in the Republic of Croatia. Those legal requirements are aligned with the accounting principles set out in IFRS standards.

The underlying accounting policies, applied in the preparation of these financial statements, are summarised below. In those accounting areas where specific accounting policies are aligned with the accounting bases prescribed by IFRS, it is possible to refer to individual Standards describing the Bank's accounting policy, and the amounts are adequately disclosed.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.2 Basis of preparation

The financial statements are prepared on the amortised or historical cost basis, except for those financial instruments that are carried at fair value. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

In preparing the financial statements the Bank's management makes judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, the disclosure of commitments and contingencies at the reporting date, as well as the amounts of income and expenses for the period. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances and the information available as of the date of preparation of the financial statements, the results of which form the basis for making the judgments about the carrying amounts of assets and liabilities that are not readily apparent from other sources. Actual results may differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of revision and future periods if the revision affects both the current and future periods. Judgments made by management in the application of appropriate standards that have a significant effect on the financial statements and estimates with a significant risk of material adjustment in the next year are described in Note 3.

The accounting policies outlined below, including changes resulting from the entry into force of new standards and amendments to the existing and interpretations that came into force (and adopted by the European Union), were applied to the periods in which they were in force.

2.2.1 Effective standards, amendments to the existing standards and implementations

The Bank has adopted the following new standards and amendments to existing standards and new interpretations published by the International Accounting Standards Board ("IASB") and adopted in the European Union and which have become effective for annual periods beginning on or after 1 January 2021.

- **Interest Rate Benchmark Reform—Phase 2—Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 (Amendments)**

In August 2020, the IASB published Interest Rate Benchmark Reform – Phase 2, Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16, completing its work in response to IBOR reform. The amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR). In particular, the amendments provide for a practical expedient when accounting for changes in the basis for determining the contractual cash flows of financial assets and liabilities, to require the effective interest rate to be adjusted, equivalent to a movement in a market rate of interest. Also, the amendments introduce reliefs from discontinuing hedge relationships including a temporary relief from having to meet the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component. There are also amendments to IFRS 7 Financial Instruments: Disclosures to enable users of financial statements to understand the effect of interest rate benchmark reform on an entity's financial instruments and risk management strategy. While application is retrospective, an entity is not required to restate prior periods. All these amendments did not have an impact on the Bank's financial statements.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.2 Basis of preparation (continued)

2.2.1 Effective standards, amendments to the existing standards and (continued)

- **IFRS 16 Leases: Covid-19-Related Rent Concessions (amendments)**

The amendment applies, retrospectively, to annual reporting periods beginning on or after 1 June 2020. Earlier application is permitted, including in financial statements not yet authorized for issue at 28 May 2020. IASB amended the standard to provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the covid-19 pandemic. The amendment provides a practical expedient for the lessee to account for any change in lease payments resulting from the covid-19 related rent concession the same way it would account for the change under IFRS 16, if the change was not a lease modification, only if all of the following conditions are met:

- The change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change.
- Any reduction in lease payments affects only payments originally due on or before 30 June 2021.
- There is no substantive change to other terms and conditions of the lease

All these amendments did not have an impact on the Bank's financial statements

2.2.2 Standards, amendments to existing standards and interpretations issued but not yet effective

- **Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Interests in Associates and Joint Ventures: Sale or contribution of assets between an investor and its associate or joint venture**

The amendments address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28, in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary. In December 2015 the IASB postponed the effective date of this amendment indefinitely pending the outcome of its research project on the equity method of accounting. The amendments have not yet been endorsed by the EU.

The Management Board has assessed that the amendments will not lead to significant changes in the Company's financial statements in the period of the first application of the standards.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.2 Basis of preparation (continued)

2.2.2 Standards, amendments to existing standards and interpretations issued but not yet effective (continued)

- **IAS 1 Presentation of Financial Statements: Classification of Short-Term and Long-Term Liabilities (Amendments)**

The amendments were initially effective for annual reporting periods beginning on or after January 1, 2022 with earlier application permitted. However, in response to the covid-19 pandemic, the Board has deferred the effective date by one year, i.e. 1 January 2023, to provide companies with more time to implement any classification changes resulting from the amendments.

The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current or non-current. The amendments affect the presentation of liabilities in the statement of financial position and do not change existing requirements around measurement or timing of recognition of any asset, liability, income or expenses, nor the information that entities disclose about those items. Also, the amendments clarify the classification requirements for debt which may be settled by the company issuing own equity instruments.

In November 2021, the Board issued an exposure draft (ED), which clarifies how to treat liabilities that are subject to covenants to be complied with, at a date subsequent to the reporting period. In particular, the Board proposes narrow scope amendments to IAS 1 which effectively reverse the 2020 amendments requiring entities to classify as current, liabilities subject to covenants that must only be complied with within the next twelve months after the reporting period, if those covenants are not met at the end of the reporting period. Instead, the proposals would require entities to present separately all non-current liabilities subject to covenants to be complied with only within twelve months after the reporting period. Furthermore, if entities do not comply with such future covenants at the end of the reporting period, additional disclosures will be required. The proposals will become effective for annual reporting periods beginning on or after 1 January 2024 and will need to be applied retrospectively in accordance with IAS 8, while early adoption is permitted. The Board has also proposed to delay the effective date of the 2020 amendments accordingly, such that entities will not be required to change current practice before the proposed amendments come into effect. These Amendments, including ED proposals, have not yet been endorsed by the EU.

The Management Board estimated that the changes in the standards will not lead to significant changes in the financial statements of the Company in the period of the first application of the standards.

- **IFRS 3 Business Combinations; IAS 16 Property, Plant and Equipment; IAS 37 Provisions, Contingent Liabilities and Contingent Assets as well as Annual Improvements 2018-2020 (Amendments)**

The amendments are effective for annual periods beginning on or after 1 January 2022 with earlier application permitted. The IASB has issued narrow-scope amendments to the IFRS Standards as follows:

- **IFRS 3 Business Combinations (Amendments)** update a reference in IFRS 3 to the Conceptual Framework for Financial Reporting without changing the accounting requirements for business combinations.
- **IAS 16 Property, Plant and Equipment (Amendments)** prohibit a company from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, a company will recognise such sales proceeds and related cost in profit or loss.
- **IAS 37 Provisions, Contingent Liabilities and Contingent Assets (Amendments)** specify which costs a company includes in determining the cost of fulfilling a contract for the purpose of assessing whether a contract is onerous.
- **Annual improvements 2018-2020** make minor amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 9 Financial Instruments, IAS 41 Agriculture and the Illustrative Examples accompanying IFRS 16 Leases.

The Management Board estimated that the changes in the standards will not lead to significant changes in the financial statements of the Company in the period of the first application of the standards.

2. ACCOUNTING POLICIES (CONTINUED)

2.2.2 Standards, amendments to existing standards and interpretations issued but not yet effective (continued)

- **IFRS 16 Leases - COVID-19 Lease Facility after 30 June 2021 (Amendments)**

The Amendment applies to annual reporting periods beginning on or after 1 April 2021, with earlier application permitted, including in financial statements not yet authorized for issue at the date the amendment is issued. In March 2021, the Board amended the conditions of the practical expedient in IFRS 16 that provides relief to lessees from applying the IFRS 16 guidance on lease modifications to rent concessions arising as a direct consequence of the covid-19 pandemic. Following the amendment, the practical expedient now applies to rent concessions for which any reduction in lease payments affects only payments originally due on or before 30 June 2022, provided the other conditions for applying the practical expedient are met.

The Management Board estimated that the changes in the standards will not lead to significant changes in the financial statements of the Company in the period of the first application of the standards.

- **IAS 1 Presentation of Financial Statements and IFRS Guideline 2: Disclosure of Accounting Policies (Amendments)**

The Amendments are effective for annual periods beginning on or after January 1, 2023 with earlier application permitted. The amendments provide guidance on the application of materiality judgements to accounting policy disclosures. In particular, the amendments to IAS 1 replace the requirement to disclose 'significant' accounting policies with a requirement to disclose 'material' accounting policies. Also, guidance and illustrative examples are added in the Practice Statement to assist in the application of the materiality concept when making judgements about accounting policy disclosures. The Amendments have not yet been endorsed by the EU.

The Management Board estimated that the changes in the standards will not lead to significant changes in the financial statements of the Company in the period of the first application of the standards.

- **IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors: Definition of Accounting Estimates (Amendments)**

The amendments become effective for annual reporting periods beginning on or after January 1, 2023 with earlier application permitted and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period. The amendments introduce a new definition of accounting estimates, defined as monetary amounts in financial statements that are subject to measurement uncertainty. Also, the amendments clarify what changes in accounting estimates are and how these differ from changes in accounting policies and corrections of errors. The Amendments have not yet been endorsed by the EU.

The Management Board estimated that the changes in the standards will not lead to significant changes in the financial statements of the Company in the period of the first application of the standards.

- **IAS 12 Income Taxes: Deferred Tax on Assets and Liabilities Arising from a Single Transaction (Amendments)**

The amendments are effective for annual periods beginning on or after January 1, 2023 with earlier application permitted. In May 2021, the Board issued amendments to IAS 12, which narrow the scope of the initial recognition exception under IAS 12 and specify how companies should account for deferred tax on transactions such as leases and decommissioning obligations. Under the amendments, the initial recognition exception does not apply to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. It only applies if the recognition of a lease asset and lease liability (or decommissioning liability and decommissioning asset component) give rise to taxable and deductible temporary differences that are not equal. The Amendments have not yet been endorsed by the EU.

The Management Board estimated that the changes in the standards will not lead to significant changes in the financial statements of the Company in the period of the first application of the standards.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.3 Functional and presentation currency

Items included in the financial statements are presented in the currency of the primary economic environment in which the Bank operates (its functional currency). The financial statements are presented in the Croatian kuna, which is both the functional and reporting currency of the Bank. The amounts are rounded to the nearest thousand (unless otherwise stated).

The principal exchange rates set by the Croatian National Bank and used in the conversion of the Bank's monetary assets and liabilities at the date of the statement of financial position were as follows:

31 December 2021	1 EUR = 7.517174 HRK	1 CHF = 7.248263 HRK	1 USD = 6.643548 HRK
31 December 2020	1 EUR = 7.536898 HRK	1 CHF = 6.948371 HRK	1 USD = 6.139039 HRK

2.4 Foreign currency translation

Transactions in foreign currencies are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the retranslation of monetary assets and liabilities denominated in foreign currencies at the year-end rates are recognised in profit and loss. Foreign currency denominated non-monetary assets and items that are measured in terms of historical cost are translated at the exchange rates in effect on the transaction dates and are not retranslated at the reporting date. Changes in fair value of debt securities denominated in a foreign currency, which are, in line with IFRS 9, measured at fair value through other comprehensive income are recognised through other comprehensive income. Foreign exchange differences and expected credit losses for these securities are recognised through profit or loss. Changes in fair value and foreign exchange differences of equity securities denominated in a foreign currency are recognised through other comprehensive income – option of fair value through other comprehensive income.

2.5 Leases

The Bank measures leases in accordance with IFRS 16.

IFRS 16 establishes the principles for the recognition, measurement, presentation and disclosure of leases, for both parties, for the user (“lessee”) and for the service provider (“lessor”).

a) Recognition of a lease liability

Following the adoption of IFRS 16, the Bank recognizes lease liabilities that relate to „operating“ leases. These liabilities are measured at the present value of the lease payments receivable as at the date of commencement of the application of IFRS 16. Lease payments are discounted at the interest rate implicit in the lease or, if that rate can not be readily determined, the incremental borrowing rate. At the date of initial recognition, lease payments included in the measurement of the lease liability include the following types of payments for the right to use the underlying asset for the life of the lease:

- fixed lease payments less all lease incentives,
- variable lease payments which are dependent on market indices,
- amounts expected to be payable by the lessee under residual value guarantees,
- the exercise price of the purchase option, if it is reasonably certain that the option will be exercised, and
- payment of contractual penalties for terminating the lease, if the lease period reflects that the lessee used the option of terminating the lease.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.5 Leases (continued)

b) Recognition of right-of-use assets

Right-of-use assets are initially measured at cost.

The cost of a right-of-use asset comprises:

- the initial estimate of lease liabilities (excluding VAT),
- all lease payments paid at the commencement date or earlier, less any lease incentives receivable, initial costs directly incurred by the lessee as a result of entering into a lease agreement,
- estimates of costs which are to be incurred by the lessee as a result of an obligation to disassemble and remove an underlying asset or to carry out renovation/restoration.

The Bank uses expedients related to short-term leases (less than 12 months) as well as in the case of leases where the related assets are of low value (less than USD 5.000 converted to the functional currency at the middle exchange rate on the contract date), for which no financial liabilities nor the right-of-use assets will be recognized. These types of payments will be recognized as expenses using the linear method over the life of the lease.

The value added tax cost under all lease contracts in accordance with IFRS 16 is recognized directly in administrative expenses and is presented in Note 8.

2.6 Interest income and expense

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

Interest income includes coupons earned on fixed income investments and securities as well as accrued discount and premium on treasury bills and other discounted instruments.

One-off loan origination fees for loans which are probable of being drawn down, are deferred (together with related direct costs) and recognized as an adjustment to the effective yield of the loan and as such adjust the interest income.

Interest income on financial assets classified as Stage 3 financial asset is recognized in the statement of profit or loss when collected.

Penalty interests for financial assets and financial liabilities are recognised in other operating income or other operating costs.

2.7 Fee and commission income and expense

The fees and commissions calculated and charged to clients by the Bank for the provision of financial services consist mainly of fees for domestic and foreign payment services and credit guarantee services, account management services, card services, asset management services and other similar financial services provided by the Bank in accordance with the registration. Fees included in the calculation of the effective interest rate are recognized as interest income and expense. Fee and commission income and expense are recognized in the profit and loss account under the service contract in question at the time the particular service is provided. Fees and commissions that are paid and charged in advance are deferred over the period of providing the service for services provided continuously over a longer period of time.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.8 Employee benefits

Short-term benefits

Obligations for contributions to defined contribution pension plans and other short-term benefits are recognised as an expense in the statement of comprehensive income for the period in which they are incurred.

Bonuses

A liability is recognised for the amount expected to be paid under short-term cash bonus plans if the Bank has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Retirement benefits

The Bank awards one-time compensation to employees whose retirement is legally required. The amount of the liability is estimated annually by an independent qualified assessor. Actuarial gains and losses arising from changes in actuarial assumptions are debited or credited to equity in other comprehensive income in the period in which they arise. Past service cost is recognized in the profit and loss account. The amount of the liability is shown in the Provisions for liabilities and charges.

Jubilee awards

The Bank awards jubilee awards to employees. The amount of the liability is estimated annually by an independent qualified assessor. The amount of the liability is recognized in the profit and loss account. The liability is shown in the Provisions for liabilities and charges.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.9 Taxation

Income tax expense is based on taxable income for the year and represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from the profit reported in the statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Bank's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for all taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Bank is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits that will allow the utilisation of the benefits arising from the temporary differences and the temporary differences are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or a part of the tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Bank expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Bank intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax for the period

Current and deferred taxes are recognised as an expense or income in profit or loss, except when they relate to items presented directly in equity, in which case the tax is also recognised in equity, or where they arise from the initial accounting for a business combination, in which case the tax effect is taken into account in accounting for the business combination.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.10 Cash and cash equivalents

For the purpose of reporting cash flows, cash and cash equivalents comprise cash, balances with the Croatian National Bank (CNB), accounts with other banks and term deposits with other banks with contractual maturities of up to three months.

Cash and cash equivalents exclude the obligatory reserves with the CNB, as these funds are not available for the Bank's day-to-day operations.

2.11 Financial instruments

Classification

The Bank recognizes regular way transactions with financial instruments at the settlement date and the derivative financial assets on the trade date. The Bank applies IFRS 9 and, depending on business model for management of financial assets and contractual cash flow characteristics, classifies financial assets into following measurement categories: financial assets at amortised cost; financial assets at fair value through other comprehensive income (FVTOCI); financial assets designated at fair value through other comprehensive income (FVTOCI); financial assets at fair value through profit or loss (FVTPL).

Financial assets at amortised cost

Financial asset is measured at amortised cost if both of following conditions are met:

- (a) the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

Financial asset is measured at fair value through other comprehensive income if both of following conditions are met:

- (a) the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets designated at fair value through other comprehensive income (option)

For investments in equity instruments that are not held for trading, the Bank may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value.

If Bank chooses this option (fair value measurement), it is valid until maturity date of instrument.

Gain/loss on disposal of equity instruments designated at fair value through other comprehensive income is never recycled to profit and loss account; unrealised gains/losses are recognized within other comprehensive income. Only dividends are recognized within profit and loss account.

Financial assets at fair value through profit or loss

Financial asset is measured at fair value through profit or loss, if not classified held to collect or held to collect and sell, unless irrevocable choice has been elected and in cases of SPPI test fail.

Derivatives, units in investment funds and securities held for trading are an examples of instruments that shall be classified in this category since payments do not represent solely payments of principal and interest on unpaid principal.

2. ACCOUNTING POLICIES (CONTINUED)

2.11 Financial instruments (continued)

Classification (continued)

Business model assessment

Business model is based on activities conducted by the Bank to achieve objectives in accordance with Bank's strategy and how Bank manages its' financial assets with aim of generating profits.

Types of business models considering cash flow generation are described in following paragraphs:

- Business model held to collect

Objective of this model is to hold assets in order to collect contractual cash flows. Sale is not integral part of this business model within assets are measured at amortised cost, but sales could be consistent with this business model provided: a) sale is frequent, but insignificant (not more than 5% assets within homogeneous group occurred in observed period), b) sale is infrequent, but significant, c) sale is close to maturity or d) sale due to increase in credit risk (e.g. interest rate increase, sale of NPL portfolio). Sale in stress liquidity situations could also be classified within this model.

During 2020 and 2021, the Bank sold several individual and one group of NPL portfolios that did not lead to a breach of the business model, but were sold due to the deterioration of the credit risk of individual clients.

- Business model held to collect and sell

Objective is achieved by collecting contractual cash flows and by sale of financial assets. It is not required to observe frequency, value and reason of sale, but typically this business model involves greater frequency and value of sales.

- Other models (other strategies)

Objective is to achieve short term profit on disposal of financial assets and this business model includes assets held for trading. All other business models are allocated in measurement category fair value through profit or loss.

Business model is determined by Bank's key management personnel. Key management personnel includes Bank's Management Board. Every Management Board member has an authority to determine business model for financial assets portfolio within his competence.

Reclassification

If and only if the Bank changes its business model for managing financial assets, it shall reclassify all affected financial assets. Such changes must be determined by the Bank's senior management as a result of external and internal changes which must be significant to the Bank's operations and there must be relevant evidence in order to support reclassification.

The Bank may not reclassify financial liabilities. The Bank reclassifies investments in debt instruments only if the business model for managing those assets changes.

The following events are not considered reclassifications:

- an item that was previously a specific and effective instrument for hedging cash flows from risk or hedging net investments from risk has ceased to qualify for such classification;
- the item has become a specific and effective instrument for hedging cash flow from risk or hedging net investments from risk

The following are not considered to be changes in business model:

- a change in intention related to particular financial assets (even in circumstances of significant changes in market conditions);
- a temporary disappearance of a particular market for financial assets; or
- a transfer of financial assets between parts of the Bank with different business models.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.11 Financial instruments (continued)

Reclassification (continued)

If the financial assets should be reclassified, the Bank shall apply the reclassification prospectively from the reclassification date. The Bank shall not restate the previously recognised gains or losses (including ones relating to loss allowance) and interest.

Reclassification "into FVTPL"

If the Bank reclassifies financial asset out of amortized cost category into fair value through profit or loss ("FVTPL"), its fair value is determined at the reclassification date. Any gain or loss arising on the difference between the amortized cost of a financial asset and its fair value is recognized in profit or loss.

If the Bank reclassifies financial assets out of the fair value through other comprehensive income ("FVOCI") into FVTPL, the financial asset continues to be measured at fair value. Cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment at the reclassification date.

Reclassification "into FVOCI"

If the Bank reclassifies financial assets out of FVTPL category into the FVOCI category, the financial asset continues to be measured at fair value.

If the Bank reclassifies a financial asset out of amortized cost category into the FVOCI category, its fair value is determined at the reclassification date. Any gain or loss arising on the difference between the amortized cost of financial assets and fair value is recognized in the OCI. The effective interest rate and the measurement of expected credit losses are not adjusted in this case.

For the FVOCI measurement category, the determination of the effective interest rate on initial recognition is required, as well as the application of relevant directive on loss allowance.

When the Bank reclassifies financial assets out of FVOCI category to the amortized cost category:

- The Bank uses the same effective interest rate, the recognition of interest income will not change,
- The measurement of expected credit losses will not change.

If a financial asset is reclassified to the FVOCI category from the amortized cost category, loss allowance would be derecognized (and therefore would no longer recognized as an adjustment to gross carrying amount), but instead would be recognized as the amount of accumulated loss allowance (in the same amount) in other comprehensive income ("OCI") and would be disclosed from the date of reclassification.

Reclassification "into amortized cost"

If the Bank reclassifies a financial asset out of the FVTPL category into the amortized cost category, its fair value at the reclassification date becomes its new gross carrying amount.

If the Bank reclassifies a financial asset out of FVOCI category to the amortized cost category, the financial asset is reclassified at its fair value at the date of reclassification. Cumulative gains or losses previously recognized in OCI are removed from equity and adjusted against the fair value of the financial asset at the date of reclassification. This adjustment affects the OCI but does not affect profit or loss and is therefore not a reclassification adjustment. The effective interest rate and the measurement of expected credit losses are not adjusted for reclassification.

For the measurement category at amortized cost, the determination of the effective interest rate on initial recognition is required, as well as the application of loss allowance requirements.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.11 Financial instruments (continued)

Reclassification (continued)

When the Bank reclassifies financial assets out of the FVOCI category to the amortized cost category:

- The Bank uses the same effective interest rate, the recognition of interest income will not change,
- The measurement of expected credit losses will not change.

However, if a financial asset is reclassified from the FVOCI category to an amortized cost category, the provision for expected credit losses is recognized as an adjustment to gross carrying amount of the financial asset from the reclassification date.

SPPI test (Solely Payment of Principal and Interest)

SPPI test is conducted to assess contractual cash flow characteristics of particular financial instruments, i.e. to assess if contractual cash flows represent solely payments of principal and interest on unpaid principal in accordance with basic lending arrangement (without specific modifications related to prepayment fee, index linked payments, mismatch between interest rate and reference interest rate etc.).

For the purpose of this test, principal is defined as fair value of financial assets at initial recognition. Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

In cases where the SPPI test indicates the existence of modification of the time value of money, an additional assessment is conducted to determine whether the modification is significant (the benchmark test). Benchmark test is conducted by comparing undiscounted contractual cash flows and undiscounted cash flows that would arise if the time value of money element was not modified (reference or benchmark cash flows).

Relevant comparable benchmark instrument is instrument with identical contractual terms and the identical credit risk, either existing or hypothetical instrument (it is not required for instrument to exist on the market).

If based on conducted assessments, result is significant difference between contractual cash flows and reference/benchmark cash flows, financial asset fails SPPI test and shall be allocated to measurement category fair value through profit or loss.

OTP Bank Nyrta has defined an SPPI test (questionnaire) that is conducted at the level of a product portfolio with the same or similar characteristics, the so-called homogeneous product groups. In specific cases of financing that cannot be attributed to a specific homogeneous product group, the SPPI test is conducted on an individual basis. This test was applied at the initial application of IFRS 9 (transition from IAS 39 to IFRS 9).

2. ACCOUNTING POLICIES (CONTINUED)

2.11 Financial instruments (continued)

SPPI test (Solely Payment of Principal and Interest) (continued)

Below are listed the basic homogeneous groups of products for which the SPPI test was conducted. The Bank further elaborates listed homogeneous groups taking into account the currency, interest rate type, certain types of funding programs, and other specific features and characteristics of the product.

1. Corporate clients products:

- Investment loans with administrative interest rate
- Investment loans with fixed interest rate
- Investment loans with variable interest rate
- Working capital loans with administrative interest rate
- Working capital loans with fixed interest rate
- Working capital loans with variable interest rate
- Other loans with administrative interest rate
- Other loans with fixed interest rate
- Other loans with variable interest rate
- Overdrafts on giro account
- Refinancing loans with administrative interest rate
- Refinancing loans with fixed interest rate
- Refinancing loans with variable interest rate
- Guarantees
- Syndicated loans

2. Small corporate clients products:

- Long-term loan with a fixed interest rate
- Long-term loan with a variable interest rate
- Long-term loan with administrative interest rate
- Long-term loan with a fixed interest rate for residential buildings
- Agro loan for pre-financing with a fixed interest rate
- Short-term loan with a fixed interest rate
- Short-term loan with administrative interest rate
- Overdrafts on a giro account with a fixed interest rate
- Overdrafts on a giro account with a variable interest rate
- Revolving loan with a fixed interest rate
- Revolving loan with a variable interest rate
- Revolving loan with administrative interest rate
- Subsidized loans with a fixed interest rate
- Subsidized loans with variable interest rate

3. Retail clients products:

- Housing loans with fixed interest rate
- Housing loans with variable interest rate
- Housing loans with combination of fixed and variable interest rate
- Subsidized housing loans
- Cash loans with fixed interest rate
- Cash loans with variable interest rate
- Lombard loans
- Express loans

SPPI test (Solely Payment of Principal and Interest) (continued)

3. Retail clients products (continued):

- Mortgage loans
- Tourism loans
- Car loans
- Housing loans without mortgage
- Overdraft loans with fixed interest rate
- Credit card loans - revolving
- Credit card loans - charge
- Credit card loans - instalment

Modifications

The modification applies to all financial assets and liabilities within the scope of IFRS 9. Any change in a contractual provision is considered a modification. The Bank defines the significance of the modification. In case of significant modification, the Bank derecognizes the existing instrument and carries out initial recognition of the new instrument. Upon initial recognition of a new instrument, the Bank implements all necessary requirements defined in IFRS 9 for the initial recognition of financial assets. If the modification is insignificant, the Bank continues to recognize the existing instrument and calculates the modification differences using the effective interest rate. Modification gains and losses are recognized as gains or losses in the statement of comprehensive income.

The most common form of modification is restructuring, where in almost all cases the Bank derecognizes an existing instrument and recognizes a new instrument. Payment delays (so-called moratoriums) and other exposure restructuring measures implemented as a result of the COVID-19 pandemic are also treated by the Bank as modifications, therefore the Bank calculates modification losses / gains. Also, insignificant modification differences result in continued recognition of the existing instrument, while in cases of significant modification differences, the Bank derecognises the existing instrument and recognizes a new one, which is subject to all requirements of IFRS 9 on initial recognition of financial assets.

Recognition and derecognition

Financial assets and liabilities are initially recognized at fair value, increased or decreased by transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. The fair value of a financial instrument on initial recognition is usually the purchase price of the transaction.

After initial measurement, the Bank measures financial assets at amortized cost or at fair value (through other comprehensive income or at fair value through profit or loss), depending on the Bank's financial asset management model and contractual cash flow characteristics.

Write-offs

The Bank writes off financial assets in cases where it is not possible to collect, or when all payment possibilities have been exhausted, or when the collection costs exceed the amount of possible collection.

The Bank writes off financial assets that are completely impaired or whose fair value is equal or approximately zero.

The Bank primarily seeks to sell such financial assets in the market. If there is no market demand for financial assets, they are written off and transferred to off-balance sheet records.

In case of financial assets recorded in off-balance sheet records, for which certain collection procedures of mostly formal nature have not yet been completed, the Bank continues to monitor them and collect wherever possible. These financial assets are finally written off only when there is no longer any reason for the Bank to continue collection, or when there is no possibility of partial collection in the future.

Discharge of debt is done by the Bank in case of sale of receivables or if the receivables are written off in line with court decisions in accordance with applicable legal regulations or in other specific cases defined in the Bank's internal policies.

In case of financial assets that are not fully written off, the remaining assets are not recognised as an existing instrument at the time of writing-off, and a new instruments is recognised in accordance with IFRS 9.

2. ACCOUNTING POLICIES (CONTINUED)

2.11 Financial instruments (continued)

Gains and losses

Gains and losses from financial assets and financial liabilities measured at fair value through profit or loss are recognized in profit and loss account.

Gains or losses from financial assets measured at amortised cost and is not part of a hedging relationship shall be recognised in profit or loss when the financial asset is derecognised or reclassified through the amortisation process or in order to recognise loss allowance gains or losses.

For debt instruments measured at fair value through other comprehensive income, gain or loss arising from change in fair value is recognized in other comprehensive income. Foreign exchange gain or loss is recognized through profit or loss in profit and loss account. When the financial asset is derecognised the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment. Interest calculated using the effective interest method is recognised in profit or loss.

Gains or losses arising from change in fair value and foreign exchange gain or loss for equity instruments designated at fair value through other comprehensive income are presented in other comprehensive income. Gain/loss resulting from disposal of equity instruments classified as fair value through other comprehensive income option is never presented within profit and loss account; accumulated gains/losses are recognized in other comprehensive income. Only dividends are recognized as gain in relevant reporting period.

Fair value measurement principles

The fair values of quoted securities are based on current closing bid prices. If the market for a financial asset is not active (and for unlisted securities), or if, for any other reason, the fair value cannot be reliably measured by market price, the Bank determines the fair value using valuation techniques. These include the use of prices achieved in recent arm's length transactions between knowledgeable and willing parties, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models, making maximum use of market inputs and relying as little as possible on entity-specific inputs. Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate. The fair value of non-traded derivatives is estimated at the amount that the Bank would receive or pay to terminate the contract at the statement of financial position date, taking into account current market conditions and the current creditworthiness of the counterparties.

Valuation techniques and assumptions for the purposes of measuring fair value

The fair values of financial assets and financial liabilities are determined as follows:

- The fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined by reference to quoted market prices (includes listed redeemable notes, bills of exchange, debentures and perpetual notes).
- The fair values of other financial assets and financial liabilities (excluding derivative instruments) are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments;
- The fair values of derivative instruments are calculated using quoted prices. Where such prices are not available, a discounted cash flow analysis is performed using the applicable yield curve for the duration of the instruments for non-optional derivatives, and option pricing models for optional derivatives. Foreign currency forward contracts are measured using quoted forward exchange rates and yield curves derived from quoted interest rates matching maturities of the contracts. Interest rate swaps are measured at the present value of future cash flows estimated and discounted based on the applicable yield curves derived from quoted interest rates.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.12 Loss allowance of financial assets

Loss allowance of financial assets measured at amortised cost

Definition and calculation method of expected credit losses for each stage

Expected credit loss calculation methodology depends on type of portfolio and risk stage of portfolio subject to assessment. Portfolio classified into lower risk stages (Stage 1 and Stage 2) is assessed collectively.

The Bank also recognizes expected credit losses on a monthly basis for exposures subject to loss allowance requirements in amounts equal to:

- 1) 12 month expected credit loss for Stage 1 risk subcategory;
- 2) lifetime expected credit loss for Stage 2 and Stage 3 risk subcategory

Portfolio classified into Stage 3 is assessed collectively with lifetime expected credit loss recognized in cases of retail portfolio and individually in cases of corporate portfolio. Exceptionally, in case of corporate portfolio, for clients with group exposure below HRK 3,000,000, collective assessment is applied in expected credit loss calculation.

For individual method, expected credit losses are calculated as difference between gross carrying amount of individual exposure and present value of expected future cash flows discounted at effective interest rate. At least two scenarios are projected for expected cash flow assessment. Weights are applied to each scenario based on probability of occurrence. The present value calculated as the weighted average of the individual scenarios is used to calculate the transaction of loss allowance. In calculation of individual expected credit losses the following information is taken into account: expected operating cash flow, expected cash from the sale of collateral (real estate), the effective interest rate, and the estimated collateral realisation period.

In case of collective assessment, the Bank uses internal model in accordance with IFRS 9 for calculation of expected credit losses, applying PD (probability of default), LGD (loss given default) and EAD (exposure at default; for off-balance exposures CCF of 100% is applied) as parameters for loss allowance calculation. Bank also applies 5 different macroeconomic scenarios that reflect forecasts. Macroeconomic scenarios and its probabilities are based on regional macroeconomic forecasts. Expected loss (EL) is calculated separately for each scenario and final expected loss (EL) assessment is weighted average of expected loss in cases of multiple scenarios. Model calculation is performed monthly.

Basic assumption in the model is credit segmentation based on client type (sovereign, banks, corporate, retail). Retail segment is further subdivided by product type into the sub-segment of housing, mortgage, cash, car and other loans and the sub-segments of overdrafts and credit cards. Each segment is further elaborated according to the time when the receivable was recorded in the system (book criterion), and according to the calculating provisions class (provisioning bucket) which is defined according to the number of days past due in combination with stage where necessary.

The classes are as follows:

Stage 1: DPD 0-30

Stage 2: DPD 0-30 when there is no delay but the claim is stage 2 according to another criterion
DPD 31-60, DPD 61-90

Stage 3: DPD 0-90 - when the claim is in default even though there is no delay over 90 days
DPD 91-120, DPD 121-150, DPD 151-180, DPD 181-360, DPD above 360

Restructured exposure with a delay of up to 30 days over a 2-year follow-up period (FP_PE)

For the purposes of capturing the LGD parameter, the ECL calculation model also uses a breakdown of secured and unsecured exposures, currencies, and number of quarters since entering the default status.

The Bank uses the aggregate method to calculate the expected credit loss of exposures classified in Stage 3 in the case of Retail portfolio (included in Note 16 Loans and receivables from customers), and to calculate the expected credit loss of exposures classified in Stage 1 and Stage 2, and for assets carried at amortized cost which is included in notes 13 Cash and balances with Croatian National Bank, 14 Loans and receivables from banks, 16 Loans and receivables from customers, 18 Financial assets measured at amortized cost, and 23 Other financial assets subject to impairment.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.12 Loss allowance of financial assets (continued)

Loss allowance of financial assets measured at amortised cost (continued)

Definition and calculation method of expected credit losses for each stage (continued)

After initial recognition financial assets are allocated into one of three stages:

- 1) Stage 1 - performing,
- 2) Stage 2 - performing, but for which significant increase in credit risk was observed since initial recognition,
- 3) Stage 3 - default and other non performing exposures

Performing assets (Stage 1) include all financial assets for which the events and conditions applicable to Stage 2 and Stage 3 do not exist at the reporting date.

A financial asset shows significant increase in credit risk (Stage 2), if in respect of which any of the following triggers exist on the reporting date, without fulfilling any of the conditions for the allocation to the default stage (Stage 3):

- the payment delay 31 to 90 (by introducing materially significant delays this trigger now works on both payment delay counter and the economic counter)
- it is classified as performing forborne,
- based on individual decision, its currency suffered a significant "shock" since the disbursement of the loan and no hedge position exists in respect thereof (CHF) (valid only for retail placements),
- the loan-to-value ratio (LTV) exceeds a predefined rate (at present 125% for secured Retail loans)
- placements where the behavioral score indicates that there are signs of deterioration, ie unidentified Stage 2 (Housing - rating 7, 8 and 9, Cash and Corporate - 8 and 9). If it is not possible to calculate the rating for placements for which a model has been developed, they are automatically classified in Phase 2. When a rating-based approach is not possible (rating is not available because the model is not developed), days of delay in the past 6 months (if 10 days have passed) are observed.
- all placements of a client whose at least one placement is classified in Stage 3 (if placements in Stage 3 are in the status of default due to objective criteria, and their balance sheet exposure exceeds 20% of the total balance sheet exposure of the client, then all other placements are in Stage 3)
- exposure is marked as a watch-list (non retail)
- In case of a threefold increase in the PD on the reporting date compared to the initially calculated PD, for housing and cash loans the exposure must be classified in phase 2. The rule applies only if the rating on the reporting date is > 5
- In case it is determined in the post-controls of approved loans that there was no adequate credit capabilities, the exposure can be considered as increased credit risk, which is why it is classified in phase 2.

A financial asset is default (Stage 3) if following conditions for allocation of exposure into default are met:

- objective criterion: consecutive DPD 90+,
- probability criterion: the analysis of the probability that the obligor getting unable to pay its credit obligations in full (criteria of "unlikely to pay", i.e. UTP)
- distressed restructuring and forborne exposure classified as NPL where the existence of UTP criteria is identified, or there is a significant NPV loss (1%) compared to the original cash flows subsequent to the restructuring measure

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.12 Loss allowance of financial assets (continued)

Purchased or originated credit impaired asset (POCI) assessment

Purchased or originated credit impaired asset is credit impaired at initial recognition.

At every reporting date, Bank recognizes cumulative change in lifetime of loss allowance for expected credit losses as loss allowance gain or loss in profit and loss account. If credit loss for POCI asset decreases after initial recognition, Bank recognizes loss allowance gain. If credit loss for POCI asset increases after initial recognition, Bank recognizes loss allowance loss.

Loss allowance of financial asset measured at fair value through other comprehensive income

At each reporting date, the Bank reassesses all financial instruments in the scope of impairment to determine if objective evidence of impairment exists. Expected credit loss definition per each stage, significant increase in credit risk identification and expected credit loss calculation methodology is identical to rules implemented for portfolio of financial assets measured at amortised cost.

Loss allowance of financial assets reclassified from off-balance sheet records

In the ordinary course of business, the Bank assumes contingent liabilities related to guarantees, letters of credit and undrawn loan commitments. Contingent liabilities are subject to the calculation of expected credit losses in accordance with the requirement of IFRS 9. When these assets become payable, they are reclassified to assets carried at amortized cost and the calculation of expected credit losses, identification of significant credit risk and loss allowance is carried out according to the rules for assets carried at amortized cost.

Loss allowance of financial assets not covered by IFRS 16 and IFRS 15

All financial assets within the scope of IFRS 15 (assets) and IFRS 16 (leases), which are not subject to impairment under IFRS 16 and IFRS 15, are subject to impairment according to IFRS 9 requirements.

2.13 Derivative financial instruments

The Bank uses derivative financial instruments to hedge economically its exposure to foreign exchange and interest rate risks arising from its operational, financing and investing activities.

In accordance with its treasury policy, the Bank does not hold or issue derivative financial instruments for speculative trading purposes. Derivatives are classified within financial instruments that are carried at fair value through profit or loss as financial instruments held for trading or as derivatives that are preferred for the risk management purposes.

Derivative financial instruments, including foreign exchange contracts, currency forward agreements and cross-currency swaps, are recognised initially in the statement of financial position and subsequently re-measured at their fair value. The fair values are obtained from quoted market prices or discounted cash flow models as appropriate. All derivatives are recognized as assets if their fair value is positive, i.e. as liabilities if their fair value is negative. Changes in fair value of derivatives that are held for trading are recognized through profit or loss. Changes in the fair value of derivatives that are held as a hedging instrument are recognized through profit or loss together with the change in fair value of the instrument being hedged.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.14 Sale and repurchase agreements

A financial asset sold under an agreement to repurchase it at a fixed price or at the sale price plus a lender's return or if it is loaned under an agreement to return it to the transferor, it is not derecognised, as the Bank retains substantially all the risks and rewards of ownership.

Securities sold under sale and repurchase agreements ('repos') are included in the statement of financial position as assets as originally classified or the Group reclassifies the asset on its statement of financial position as a repurchase receivable if the transferee obtains the right to sell or pledge the asset. The corresponding liability towards the counterparty is included in amounts due to banks or amounts due to customers as appropriate.

Securities purchased under agreements to purchase and resell ('reverse repos') are recorded as assets due from banks or as loans and receivables as appropriate.

The difference between the sale and repurchase price is treated as interest and accrued over the life of the repo agreement using the effective interest method.

2.15 Tangible and intangible assets

Tangible and intangible assets are stated at cost less accumulated depreciation/amortisation and impairment loss, if any. Land and assets under development are not depreciated.

Depreciation and amortisation are provided for all assets, except for land and assets under construction, under the straight line method at rates estimated to write down the cost of each asset to its residual value over the estimated useful life, which is as follows:

	2021	2020
Tangible assets		
Buildings	33-40 years	33-40 years
Computers	4-5 years	4-5 years
Furniture and equipment	2.5-10 years	2.5-10 years
Motor vehicles	4-5 years	4-5 years
Intangible assets		
Investment in leased assets	according to the years of rent	according to the years of rent
Software	3-5 years	3-5 years
Contracts with customers	5 years	5 years

The Bank depreciates buildings for which the value cannot be divided into components at a uniform rate, because it is not possible to estimate the value of each individual component.

The residual value of the asset, the depreciation method and estimated useful lives are reviewed at each reporting date and adjusted if necessary. Where the carrying amount of an asset exceeds its estimated recoverable amount, it is written down to the recoverable amount.

Gains and losses on the sale of property and equipment are determined as the difference between the amount charged and the carrying amount and are included in the statement of profit or loss. In the carrying amount of property and equipment the Bank includes the cost of replacing the part of an item when such cost arises if it is probable that the Bank will have future economic benefits contained in that item and if the purchase value of such item can be reliably estimated. All other repair and maintenance costs are recognized as incurred.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.16 Impairment of tangible and intangible assets

Assets that have an indefinite useful life, such as goodwill, are not subject to amortisation and are tested for impairment at least annually. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Intangible assets that are not yet available for use are assessed at each reporting date. Impairment losses are recognised whenever the carrying amount of an asset exceeds the asset's recoverable amount. Impairment losses are recognised in the statement of comprehensive income. An impairment loss is recognized in all cases where the carrying amount of an asset is greater than its recoverable amount.

The recoverable amount of property and equipment and of intangible assets is the higher of an asset's fair value less costs to sell and value in use. For the purpose of assessing impairment, assets are grouped at the lowest level for which there is separately identifiable cash inflows (cash-generating units). In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or cash-generating unit.

Non-financial assets that have suffered an impairment loss are reviewed for possible reversal of the loss at each reporting date. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of accumulated depreciation or amortisation, if no impairment loss had been recognised.

2.17 Investment property

Investments into property are carried at cost less accumulated depreciation and impairment losses. These investments include those investments held for the purpose of earning rent or increasing their market value, but not those held for sale. Investments are depreciated on a straight-line basis at prescribed rates, which write off the acquisition cost over the estimated useful life. The useful life and the residual value are checked and adjusted as necessary at each reporting date. Transfers to and from real estate investments are made when a change of property occurs, which is manifested upon termination or commencement of use by the owner. Investments are derecognized upon disposal or upon final retirement or when no future benefits are expected from disposal. Gains or losses on withdrawal or disposal are recognized in the profit and loss account in the period of withdrawal or disposal.

2.18 Non-current assets held for sale

Assets that are expected to be offset primarily by sale rather than continued use are classified as held for sale. The following conditions must be fulfilled:

the property must be available for sale in its existing condition; its sale must be highly probable; as expected and planned sale must occur within one year from the date of classification.

Prior to being classified as held for sale, assets are measured in accordance with the accounting policies of the Bank, after which they are measured at the lower of cost or fair value less costs to sell, whichever is lower. Non-current assets classified as held for sale are not depreciated. At the time of reclassification, when a change of intention or when the conditions required by IFRS 5 are no longer met, the Bank does not restate the comparative information in the Statement of financial position. In the case of reclassification, the valuation is adjusted in accordance with the relevant standards, as if no reclassification had taken place.

2.19 Investment in subsidiaries

Subsidiaries are entities controlled by the Group. Investments in subsidiaries are carried at cost decrease for any impairment losses in the Bank's financial statements.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.20 Assets acquired in lieu of uncollected receivables

Occasionally, the Bank forecloses properties and other assets to recover the outstanding loans and advances to customers. Such properties and other assets are recognised at the lower of the net realisable value and current fair value. The Bank seeks to sell the foreclosed assets and only exceptionally makes them available for its own use. Such properties are presented in Note 23 Other assets.

After initial recognition, the assets taken are measured in accordance with the relevant accounting standards, depending on the intention to hold the asset. The Bank measures the assets under IAS 2 *Inventories* except in rare cases when the asset is put into use.

Gains and losses on the sale of such assets are recognised in profit or loss.

2.21 Current accounts and deposits from banks and customers

Current accounts and deposits are measured initially at fair value plus transaction costs and subsequently at amortised cost using the effective interest method.

The definition of the calculation of expected credit losses for each stage, the identification of significant credit risk, and the manner of determining the loss allowance for expected credit losses are consistent with the rules for the portfolio of financial assets carried at amortized cost.

2.22 Other financial liabilities

Other financial liabilities include other borrowed funds (interest-bearing loans) that are initially recognized at fair value, decreased for the relating transaction costs incurred. Subsequent measurement is carried at amortized cost and any difference between the proceeds (decreased for transaction costs) and the amount payable on maturity is recognized in the income statement over the loan period using the effective interest method.

Other financial liabilities include all financial liabilities that are not held for trading or are not predetermined to be stated at fair value through profit or loss. Other financial liabilities include liabilities to other banks, liabilities to customers and other borrowed funds.

2.23 Provisions

The Bank recognises a provision when it has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation. The Management Board determines the adequacy of the provision based by analysing individual items, past loss experience, considering the current economic conditions, the risk characteristics of the various categories of transactions and other pertinent factors at the reporting date. Provisions are discounted to present value where the effect is material.

Restructuring provision are recognized if the Bank has made formal restructuring plan and if initiation of the plan or publishing their main features among those affected with the plan has initiated reasonable expectation that restructuring will be performed. Only direct restructuring costs are included in determining the amount of restructuring provisions, and these are costs that are necessarily related to the restructuring but are not related to the entity's current operations.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.24 Off-balance sheet commitments

In the ordinary course of business, the Bank enters into credit related commitments which are recorded in off-balance-sheet records and primarily include guarantees, letters of credit and undrawn loan commitments. Such financial commitments are included in the Bank's statement of financial position if and when they become payable.

The definition of the calculation of expected credit losses for each stage, the identification of significant credit risk, and the manner of determining the impairment are consistent with the rules for the portfolio of financial assets that are carried at amortized cost. In the aggregate method, the Bank uses an internal IFRS 9 model to calculate expected credit losses using PD (probability of default), LGD (loss given default) and EAD (exposure at default); 100% credit conversion factor applies to off-balance sheet contingent liabilities) parameters for loss allowance for expected credit losses. Please see Note 2.12 for more details.

2.25 Asset managed on behalf of third parties

Assets and income arising thereon, together with related undertakings to return such assets to customers, are excluded from these financial statements when the Bank acts in a fiduciary capacity such as a nominee, trustee or agent. Fees for such services are recognised as income when earned.

2.26 Share capital

Share capital represents the nominal value of paid-in ordinary shares classified as equity and is denominated in Croatian kunas.

Dividends are recognised as a liability in the period in which they are declared.

2.27 Retained earnings

Any profit for the year retained after appropriations is transferred to reserves.

2.28 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are charged to the profit or loss for the period in which they are incurred. The bank did not have assets that met the criteria for capitalization of borrowing costs.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

2. ACCOUNTING POLICIES (CONTINUED)

2.29 Reclassification of comparable period

In 2021, the Bank made reclassifications in its financial statements in accordance with the policies of OTP Bank Nyrt:

- reclassification from Intangible Assets to Property and Equipment relates to the Bank's investments in leased assets - reconstruction and interior design/adaptation of business premises (see Notes 20 and 22)
- reclassification from Other Liabilities to Provisions for liabilities and charges relates to provisions for unused vacations (see Notes 28 and 29).

The reclassifications carried out have no impact on the Income statement.

	Note	Report for 2020	Reclassification	Revised report for 2020
Property and equipment	20	335	20	355
Intangible assets	22	147	(20)	127
Other liabilities	29	352	(12)	340
Provisions for liabilities and charges	28	486	12	498
		1,320	-	1,320

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

3. ACCOUNTING ESTIMATES AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES

The Bank makes certain judgments and estimates about uncertain events, including estimates and judgments concerning the future. Such accounting estimates and judgments are regularly reviewed and are based on past experience and other factors, such as the reasonably expected course of future events under given circumstances, but which nevertheless represent sources of uncertainty. The estimation of loss allowances for expected credit losses in the Bank's credit risk portfolio represents the most significant source of estimation uncertainty. The risk as well as other key sources of estimation uncertainty with a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are described below.

Loss allowance for expected credit losses on financial assets that is subject to impairment, including the requirements in accordance with Decision on the classification of exposures into risk categories and the method of determining credit losses (OG 114/17 and 110/18) and IFRS 9

Bank continuously monitors credit worthiness of its customers. In accordance with regulation, impairment of on-balance and off-balance exposures to credit risk is assessed at least quarterly.

Expected credit losses are recognized as a decrease of the net book value of:

current accounts with banks (presented in Note 13), loans and receivables from banks and other customers (presented in notes 14 and 16), impairment for financial assets measured at amortised cost (presented in note 18), receivables from other financial assets measured at amortized cost (presented in note 23), impairment losses for assets measured at fair value through other comprehensive income (presented in note 17). Loss allowance for risks and costs resulting from potential liabilities, loan commitments, mostly in form of granted unused credit lines, guarantees, letters of credit and unused credit card limits (presented in note 31) are recognized as a provision (presented in Note 28).

The estimate of expected credit losses represents the best estimate of the risk of default and expected credit losses (ECL) on financial assets, and all off-balance sheet exposures, on the reporting date, and as a part of this, the fair value estimation of collateral in real estate is the main source of estimation uncertainty. This and other key sources of estimation uncertainty have a significant risk of causing possible significant adjustments to the carrying amounts of assets and liabilities in the next financial year.

Expected credit loss is present value of difference between contractual cash flows that are due to an entity in accordance with the contract and all the cash flows that the entity expects to receive. For lifetime expected credit losses, an entity shall estimate the risk of a default occurring on the financial instrument during its expected life. 12-month expected credit losses are a portion of the lifetime expected credit losses and represent the lifetime cash shortfalls that will result if a default occurs in the 12 months after the reporting date (or a shorter period if the expected life of a financial instrument is less than 12 months), weighted by the probability of that default occurring.

For calculation of expected credit losses Bank uses internal model in accordance with IFRS 9 applying PD (probability of default), LGD (loss given default) and EAD (exposure at default) as impairment parameters. Risk parameters also depend on macroeconomic scenarios. Expected loss (EL) is calculated separately for each scenario and final expected loss (EL) assessment is weighted average of expected loss in cases of multiple scenarios. Model calculation is performed monthly- Basic assumption in the model is credit segmentation based on client type (sovereign, banks, corporate, retail). These parameters for calculating expected credit losses are usually estimated once a year.

When determining expected credit loss that exists on reporting date, but that is not separately identified, Bank uses internal model in accordance with IFRS 9.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

3. ACCOUNTING ESTIMATES AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES (CONTINUED)

Taxation

The Bank determines its tax liabilities in accordance with the tax legislation of the Republic of Croatia. Tax returns are subject to the approval of the Tax Administration, which may perform subsequent tax audits of taxpayers' records. The tax calculation and estimates are presented in Note 11.

Regulatory requirements

The CNB is responsible for performing prudential oversight over the Bank's operations and may require from the Bank to revise the carrying amounts of its assets and liabilities in accordance with applicable regulations.

Litigation and restructuring costs

The Bank makes provisions for litigation and restructuring costs in accordance with IAS 37. Provisions are recognized when the Bank has a present obligation as a result of past events and for which the Bank is aware that they have been incurred, and if it is probable that an outflow of resources containing economic benefits will be required to settle the liabilities and if the amount of the liabilities can be measured reliably. Provisions are reduced only for those expenses for which provisions are initially recognized. If an outflow of economic benefits to settle the obligation is no longer probable, provisions are reversed.

When forming provisions for litigation, the Bank also takes into account all the criteria laid down in the Decision of the Croatian National Bank on the obligation to make provisions for litigation conducted against a credit institution.

In the ordinary course of business, several lawsuits and complaints have been filed against the Bank, the outcome of which is uncertain.

According to the Management's estimate, the provisions formed are sufficient to cover the costs of active litigation and restructuring costs.

Estimates for litigation and restructuring costs are disclosed in Note 28 Provisions for liabilities and charges.

Impairment of non-financial assets

The residual value, the depreciation method and the useful life of an assets are reviewed at least at each financial year-end and adjusted if appropriate. The net carrying amount of a non-financial asset is reduced to its recoverable amount if the asset's net carrying amount is greater than its estimated recoverable amount.

For details see accounting policies Notes 2.16 to 2.20.

Fair value measurement

The fair values of quoted securities are based on current closing bid prices. If the market for a financial asset is not active (and for unlisted securities), or if, for any other reason, the fair value cannot be reliably measured by market price, the Bank determines the fair value using valuation techniques. These include the use of prices achieved in recent arm's length transactions between knowledgeable and willing parties, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models, making maximum use of market inputs and relying as little as possible on entity-specific inputs. Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate.

The fair value of non-traded derivatives is estimated at the amount that the Bank would receive or pay to terminate the contract at the statement of financial position date, taking into account current market conditions and the current creditworthiness of the counterparties. For details please accounting policies Note 2.11 *Financial instruments*.

The fair value of investment property is measured using appraisals performed by an external independent appraiser.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

4. NET INTEREST INCOME

	2021	2020
Interest income		
Retail loans	821	835
Corporate loans	276	277
Debt securities	73	82
Cash reserves and amounts due from other banks	14	4
	<u>1,184</u>	<u>1,198</u>
Interest expenses		
Other borrowed funds and amounts owed to banks	13	18
Current accounts and deposits from individuals	8	14
Current accounts and corporate deposits	5	10
Interest expenses IFRS 16	2	3
	<u>28</u>	<u>45</u>

Included in various items within interest income for the year ended 31 December 2021, a total of HRK 99 million (2020: HRK 56 million) refers to the interest income charged on the assets which were previously impaired as Stage 3.

Deferred interest loan origination fees are recognized in interest income as an adjustment to the effective interest income. The total amount of these fees in interest income in 2021 is HRK 34 million (2020: HRK 39 million). Penalty interest calculated on loans and receivables from customers is shown in other operating income (Note 7).

Revenue recognized in accordance with IFRS 15 amounts to HRK 1,184 million (2020: HRK 1,198 million) and is recognized as a point in time.

5. NET FEE AND COMMISSION INCOME

a) Net fee and commission income – analysis by source

	2021	2020
Fee and commission income		
Retail customers	242	233
Corporate customers	176	133
Banks	75	60
	<u>493</u>	<u>426</u>
Fee and commission expense		
Banks	72	53
Corporate customers	52	44
	<u>124</u>	<u>97</u>

(All amounts are expressed in millions of HRK)

5. NET FEE AND COMMISSION INCOME (CONTINUED)

b) Net fee and commission income – analysis by fee type

	2021	2020
Fee and commission income		
Domestic payment transaction related fees and commissions	117	107
Package fees charged to individuals	100	100
Card-related fees and commissions	80	64
Merchant fees for card business	65	42
Account maintenance fees	20	20
Fees for other services related to client accounts	18	16
Asset management fees	17	16
Loan-related fees and commissions	16	14
Foreign payment transaction related fees and commissions	16	12
Guarantee-related fees and commissions	14	13
Sale of insurance policies	11	8
Brokerage and consultancy service fees	6	4
Exchange office business – commission	2	2
Other fees and commissions received	11	8
	493	426
Fee and commission expense		
Card-related fees and commissions	68	51
Domestic payment transaction related fees and commissions	27	22
Foreign payment transaction related fees and commissions	8	6
Asset management fees	5	4
Other fees and commissions paid	16	14
	124	97

Revenue recognized in accordance with IFRS 15 amounts to HRK 493 million (2020: HRK 426 million) and is recognized as a point in time.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

6. NET GAINS FROM TRADING AND VALUATION OF FINANCIAL INSTRUMENTS

a) Net (losses)/gains from trading and valuation of financial instruments at fair value through profit or loss

	2021	2020
Net gains/(losses) on derivatives	41	(91)
Net gain on financial asset at fair value through profit or loss	50	33
Net gain on reclassification of financial assets at fair value through other comprehensive income into financial assets at fair value through profit or loss	-	33
	<u>91</u>	<u>(25)</u>

Financial assets measured through profit or loss, to which these net (losses) / gains relate, are included in Note 15. The reclassification of financial assets in 2020 relates to the preferred share of VISA International Series C (details in Note 15).

b) Net gains from trading and valuation of financial instruments at fair value through other comprehensive income

	2021	2020
Realised (losses)/gains on securities at fair value through other comprehensive income	<u>(10)</u>	<u>8</u>
	<u>(10)</u>	<u>8</u>

Financial assets measured through other comprehensive income, to which these net (losses) / gains relate, are included in Note 17. The amount of HRK 10 million refers to the adjustment on the basis of realized securities acquired during the acquisition of the former Splitska banka d.d.

c) Net gains from trading and converting monetary assets and liabilities

	2021	2020
Net gains from currency sale and purchase	142	111
Net (loss)/gain from conversion of monetary assets and liabilities denominated in foreign currencies and foreign currency clause	<u>(47)</u>	<u>128</u>
	<u>95</u>	<u>239</u>

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

7. OTHER OPERATING INCOME

	2021	2020
Amounts recovered through court actions	11	7
Sale of OTP Osiguranje d.d.	11	-
Collection of written-off receivables from previous years	4	2
Inventory income	4	1
Leases	3	3
Default interest on loans and receivables from customers	3	2
Sale of real estate and equipment	1	8
Reverse of accrued costs	1	8
Dividends received	1	1
Collected costs of court fees	1	1
Lease modifications IFRS 16	-	2
Other income	4	1
	<u>44</u>	<u>36</u>

During 2021, several lawsuits were settled in which the Bank made a profit of HRK 11 million.

On 31 August 2021, the Bank sold a 100% stake of OTP Osiguranje d.d. which in 2020 was classified as Assets held for sale and generated revenue of HRK 11 million.

Revenues from rents are mostly related to revenues from properties rental, out of which HRK 1 million (2020: HRK 0.5 million) is related to revenues from properties which are fully leased, while the rest is related to properties which are used by the Bank, and whose insignificant part is leased, as well as revenues from rent which are paid by telecoms for lease of premises at the top of buildings for their antennas and other communication devices.

Gains from the sale of property and equipment relate to the sale of the building with the associated land, ATMs and vehicles, details are provided in Note 20.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

8. OTHER OPERATING EXPENSES

	2021	2020
Professional services and cost of material	223	213
Marketing expenses	38	31
Administrative expenses	29	34
Remediation contribution	19	14
Savings deposit insurance premiums	17	59
Impairment of tangible assets, asset taken in lieu and asset held for sale	7	4
Other taxes and contributions	6	5
Supervision fee	5	5
Tangible and Intangible assets write-off	2	1
Inventory write-offs	1	2
Other costs	3	1
	<u>350</u>	<u>369</u>

In 2021, the external auditor provided services as follows: audit of quarterly and annual financial statements, audit of the reporting package to OTP Bank Nyrt Hungary, other agreed procedures to verify compliance with financial, accounting or regulatory matters, statutory engagement, and assessment of compliance of general information system controls. In accordance with EU Regulation 537/2014, services provided during the year are services that are allowed. The cost of od mentioned services amounts to HRK 3 million for 2021 (2020: HRK 4 million).

The costs of auditing are shown under the position Professional services and cost of materials. Property and equipment (Note 20) and Investment property (Note 21) are adjusted to fair value. The loss from the value adjustment of these assets amounts to HRK 7.2 million, of which HRK 6.8 million relates to Tangible assets and equipment and the remaining HRK 0.4 million to Real estate investments.

8a DEPRECIATION AND AMORTISATION EXPENSE

	2021	2020
Depreciation of tangible assets (Note 20)	64	66
Assets classified under IFRS 16 (Note 20a)	37	36
Depreciation of investment property (Note 21)	1	1
Amortisation of intangible assets (Note 22)	49	56
	<u>151</u>	<u>159</u>

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

9. PERSONNEL EXPENSES

	2021	2020
Gross salaries	328	319
- net salaries	239	228
- taxes, surtaxes and contributions	89	91
Contributions on salaries	50	49
Accrued expenses for bonuses and other employee expenses	54	52
	<u>432</u>	<u>420</u>

The Bank had 2,377 employees (2020: 2,327) at year-end. This information includes all employees who have concluded an Employment Contract with the Bank as at 31 December 2021.

10. NET GAINS / (LOSSES) FROM LOSS ALLOWANCE FOR EXPECTED CREDIT LOSSES AND PROVISION

	Note	2021	2020
(Increases) of expected credit loss of current accounts with banks	13	(6)	-
Decreases/(increases) of expected credit loss of loans and receivables from customers	16	27	(418)
(Increases) of expected credit loss of financial assets measured at amortized cost	18	(10)	(1)
Decreases/(increases) of expected credit loss of investments measured through other comprehensive income	17	8	(13)
(Increases) of expected credit loss of other asset	23	(7)	(7)
(Increases) of litigation provisions	28	(74)	(53)
Decreases of expected credit loss of contingent liabilities and commitments	31	28	8
Decreases in provisions for other liabilities	28	2	-
		<u>(32)</u>	<u>(484)</u>

The loss allowance for expected credit losses classified in Stage 1 and Stage 2, from the total loss allowance for expected credit losses, amounts to HRK 79 million (2020: loss of HRK 196 million). Loss related to Stage 3 amounts to HRK 39 million (2020: loss of HRK 235 million).

In accordance with the transition Decision of the CNB, as of 1 January 2020 the requirement to maintain the minimum of 0.8% total expected credit loss for exposures classified in Stage 1 and Stage 2 was abolished.

This abolishment resulted in a release of HRK 106 million. However, as loss allowance for expected credit loss increased due to a recalibration of risk parameters, resulting in an increase by HRK 222 million.

The Bank still recognizes additional 5% of loss allowance for expected credit losses for every 180 days past due for default exposures, in accordance with the CNB's Decision. Quantitative effect of the overlay described above in 2021 amounts to HRK 7,3 million (2020: HRK 4 million).

Total increase of impairment allowance for expected credit losses on loans and receivables from customers in 2020 include collected written-off receivables from previous years related to receivables from Fortenova Group (former Agrokor), which were collected from Societe Generale, France in accordance with the Agreement on the purchase of the former Splitska banka d.d. in the amount of HRK 75 million.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

11. TAXATION

(a) Income tax expense recognised in profit or loss

	2021	2020
Current income tax	111	86
Net deferred tax (credit)/charge	<u>38</u>	<u>(29)</u>
	<u>149</u>	<u>57</u>

(b) Reconciliation of the accounting profit and income tax expense at the tax rate of 18%

	2021	2020
Profit before tax	<u>780</u>	<u>308</u>
Tax at the statutory rate of 18%	141	55
Non-taxable income, net of expenses not recognised for tax purposes	19	11
Non-deductible tax expense – reclassification VISA shares	-	(2)
Expenses not tax deductible until realization	40	82
Utilisation of tax losses from previous years	<u>(89)</u>	<u>(60)</u>
Current income tax	<u>111</u>	<u>86</u>
Reconciliation of taxes from previous years	-	-
Deferred tax on expenses not tax deductible until realization	(40)	(82)
Deferred tax on utilisation of tax losses from previous years that were not tax deductible	89	60
Deferred tax at fair value from integration with Splitska banka	<u>(11)</u>	<u>(7)</u>
Deferred tax	<u>38</u>	<u>(29)</u>
Current year income tax recognised in profit and loss	<u>149</u>	<u>57</u>
Effective tax rate	19.10%	18.51%

Deferred tax related to the reclassification of VISA shares for the portion of fair value for which deferred tax was formed in the former Splitska banka amounts to HRK 2 million. In 2020, this deferred tax was reclassified from deferred tax liability to current tax liability. The tax adjustment from previous years refers to the over-calculated tax in previous periods, which was corrected in 2019.

Current tax liability amounts to HRK 111 million (2020: HRK 90 million) and advances have been paid in the amount of HRK 107 million and the overpayment from 2020 in the amount of HRK 9 million was used (2020: HRK 245 million, and contains total advances paid in the amount of HRK 100 million in 2020 and tax payments for 2019 in the amount of HRK 145 million), whereby the income tax receivable as at 31 December 2021 amounts to HRK 5 million (2020: HRK 10 million).

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

11. TAXATION (CONTINUED)

(c) Movement in deferred tax assets and liabilities

	Deferred loan origination fees	Provision according to Note 28	Negative fair values at financial assets measured at fair value through profit or loss	Impairment of investments in subsidiaries and impairment of tangible assets held for sale	Unrealised gains/(losses) on FVOCI securities	Unrealized gains / (losses) at fair value from integration with Splitska banka	Other	Total
Balance at 31 December 2020	7	40	61	3	(34)	(23)	21	75
Through profit or loss	-	(1)	(48)	1		11	(1)	(38)
Through other comprehensive income	-	-	-	-	5	-	-	5
Through retained earnings (tax on gain from bargain purchase)	-	-	-	-	-	-	-	-
Balance at 31 December 2021	7	39	13	4	(29)	(12)	20	42

The amounts under Other consist of deferred tax assets of HRK 10 million based on provisions for severance and employee retention and HRK 10 million based on expenses for which the Bank has not received invoices by the reporting date.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

11. TAXATION (CONTINUED)

(c) Movement in deferred tax assets and liabilities (continued)

	Deferred loan origination fees	Provision according to Note 28	Negative fair values at financial assets measured at fair value through profit or loss	Impairment of investments in subsidiaries and impairment of tangible assets held for sale	Unrealised gains/(losses) on FVOCI securities	Unrealized gains / (losses) at fair value from integration with Splitska banka	Other	Total
Balance at 31 December 2019	7	42	42	3	(51)	(30)	16	29
Through profit or loss	-	(2)	19	-	-	7	5	29

Through retained earnings (tax on gain from bargain purchase)	-	-	-	-	5	-	-	5
Balance at 31 December 2020	7	40	61	3	(34)	(23)	21	75

The amounts under Other consist of deferred tax assets of HRK 8 million based on provisions for severance and employee retention and HRK 13 million based on expenses for which the Bank has not received invoices by the reporting date.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

12. BASIC AND DILUTED EARNINGS PER SHARE

For the purposes of determining earnings per share, for total earnings the Bank's profit for the current year attributable to the ordinary shareholders of the Bank is used. A reconciliation of the profit for the year attributable to ordinary shareholders is provided below.

	31/12/2021	31/12/2020
Profit attributable to ordinary shareholders	631	251
Weighted average number of shares	<u>19,968,774</u>	<u>19,968,774</u>
Earnings per share basic (in HRK)	<u>31.61</u>	<u>12.56</u>
Earnings per share diluted (in HRK)	<u>31.61</u>	<u>12.56</u>

13. CASH, CURRENT ACCOUNTS WITH BANKS AND BALANCES WITH CROATIAN NATIONAL BANK

	31/12/2021	31/12/2020
Cash in hand	730	663
Current account balance	4,536	2,128
FX settlement account with the CNB	5	53
Current accounts with foreign banks	1,816	2,583
Current accounts with domestic banks	<u>34</u>	<u>132</u>
Assets included in cash and cash equivalents (Note 32)	7,121	5,559
Obligatory reserve at the Croatian National Bank	<u>2,205</u>	<u>1,906</u>
	<u>9,326</u>	<u>7,465</u>
Impairment on expected credit losses	<u>(6)</u>	<u>-</u>
	<u>9,320</u>	<u>7,465</u>

Foreign currency settlement account with the CNB is an account the Bank has opened for the purpose of settlement of national and cross-border payment transactions in euro in real time via TARGET2. The TARGET2-HR national component commenced production on 1 February 2016 in accordance with the National Migration Plan to SEPA. By including the component, TARGET2-HR becomes the twenty-fifth component of the TARGET2 payment system. Participants in the TARGET2-HR component are the Croatian National Bank and credit institutions that have signed a participation agreement. The Croatian National Bank accrues interest on the PM account in the TARGET2-HR system, which is 0.25% higher than the reference ECB deposit interest rate on excess foreign currency liquidity in excess of its foreign currency reserve obligation.

Due to the nature of the receivables, on assets with the CNB Bank does not allocate impairment on expected credit loss since expected credit loss is insignificant.

15. FINANCIAL ASSET AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS

	31/12/2021	31/12/2020
Units in open-end investment funds managed by related party	133	132
Bonds issued by the Republic of Croatia, listed on the market	129	95
Derivative financial assets	92	70
VISA International Series C preferred stock	39	37
Loans	6	22
Other securities measured at fair value through profit or loss	-	92
	399	448

During 2016, the Bank acquired VISA International Series C preference shares and classified them as available-for-sale financial instruments in accordance with IAS 39.

In accordance with IFRS 9, from 1 January 2018, the Bank measures the respective shares at fair value through other comprehensive income and accordingly they are presented in the financial statements as at 31 December 2019 in Note 17.

In accordance with the nature and characteristics of the preferred share of VISA International Series C, and the variability in the conversion factor, which changed compared to the comparable period, the Bank reviewed the classification of mentioned share in 2020 and identified that the preferred shares of VISA International Series C due to changes in variability in the conversion factor no longer meets the previous requirements for classification in accordance with IAS 32 - Presentation.

The change of classification was executed in accordance with IAS 8 (Accounting Policies, Changes in Accounting Estimates and Errors) as of 30 June 2020, when a preferred share of VISA International Series C was classified as a security mandatorily measured at fair value through profit or loss. The effect of reclassification from Financial assets measured at fair value through other comprehensive income into financial assets measured at fair value through profit or loss amounts to:

- Total effect through other comprehensive income (Note 30) - a decrease of HRK 33 million
- Effect presented through profit or loss (Note 6a) - an increase of HRK 33 million
- Effect presented through retained earnings (Note 30) - an increase of HRK 5 million
- Current and deferred tax liability – a decrease of HRK 6 million

Visa Inc. is obliged to partially convert the preferred share of Visa International Series C into Visa tradeable shares. In this context, on 24 September 2020, VISA Inc reduced the conversion factor for Visa Series C preferred shares from 13,722 to 6,861, while each holder of a share of preferred stock will receive a number of shares of Series A preferred stock equal to the applicable conversion adjustment divided by 100. The Bank classified the Series A preferred stock as Financial assets at fair value through other comprehensive income (Note 17).

During 2021, there were no status changes for the preferred share of Visa International Series C.

Other securities measured at fair value through profit or loss relate to Fortenova's securities acquired in the process of restructuring the Agrokor Group which were sold for HRK 135 million in June 2021. The effect of sales is presented in Note 6 a).

**15. FINANCIAL ASSET AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS
(CONTINUED)**

	2021			2020		
	Asset	Liabilities	Contractual amount	Asset	Liabilities	Contractual amount
Derivatives held for trading						
FX Swap and Forwards	66	54	6,802	44	96	5,772
Interest rate swap	26	20	803	26	20	896
Derivatives – fair value hedge						
Interest rate swap	-	4	38	-	6	38
Derivatives used to hedge cash flow						
Interest rate swap	-	2	2	-	-	-
	92	80	7,645	70	122	6,706

Derivative financial instruments held for trading allow the Bank and its clients to transfer, modify or reduce the currency and / or interest rate risk. In addition to standard currency derivatives (primarily forwards) used to manage currency risk, the Bank also contracts interest rate swaps to minimize the risk of interest rate fluctuations. The Bank does not use hedge accounting other than for individual derivatives disclosed in this note. All derivatives have been agreed on the OTC market.

Industry sectors are defined according to the structure of the FINREP report.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

17. FINANCIAL ASSETS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

	31/12/2021	31/12/2020
Equity securities	92	87
Debt securities	<u>5,818</u>	<u>5,526</u>
	<u>5,910</u>	<u>5,613</u>

(a) Equity securities

	31/12/2021	31/12/2020
Listed	88	83
Unlisted	<u>4</u>	<u>4</u>
	<u>92</u>	<u>87</u>

This note includes equity securities that are not held for trading nor are acquired through acquisitions to which IFRS 3 applies. In accordance with OTP Bank Nyrta policies, they are held at fair value through other comprehensive income – the option of fair value through other comprehensive income.

Unlisted equity securities are recorded at investment cost and their fair value amount to HRK 4 million (2020: HRK 4 million). There is no active market for these securities. Given the portfolio that the Bank has and the motive for its presence in the Bank's balance sheet, the most appropriate valuation method (internal model) is the residual income method.

Residual income is recognized as net income less opportunity costs incurred, in this case, by owning a stake in a particular economic entity. From the position of the economic entity (the company) it is the residual, part of the income after the calculation of the cost of capital of the company.

Other listed equity securities for which fair value can be measured reliably are held at fair value through other comprehensive income – the option of fair value through other comprehensive income. The equity shares valuation method is explained in Note 40.

The impact of changes in fair value through other comprehensive income is disclosed in Note 30 and 17b.

During June 2020, the Bank reclassified the preferred share of VISA International Series C out of financial assets at fair value through other comprehensive income (Note 17) to financial assets at fair value through profit or loss (Note 15). A more detailed description is given in Note 15.

The Bank received dividends of HRK 771 thousand from VISA International in 2021 (2020: HRK 6720 thousand). The equity ownership in VISA International is listed.

For other equity securities shown in Note 17, the Bank received a dividend in the amount of HRK 4 thousand in 2021 (2020: HRK 8 thousand).

Notes to the unconsolidated financial statements (continued)

17. FINANCIAL ASSETS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME (CONTINUED)

Overview of the Bank's investments in equity securities with a breakdown of listed and unlisted securities on 31 December 2021 and 2020 is given below.

Company name	Type of investment	Listed/unlisted
VISA International (Series A)	Preferential share	listed
VISA International (Series C)	Ordinary share	listed
Zagrebačka burza d.d.	Ordinary share	listed
Hrvatski nogometni klub Hajduk Split š.d.d.	Ordinary share	unlisted
Hrvatski registar obveza po kreditima d.o.o.	Investment in ltd.	unlisted
Istarska autocesta d.o.o.	Investment in ltd.	unlisted
Središnje klirinško depozitarno društvo d.d.	Ordinary share	unlisted
SWIFT-Fortis Bank	Preferential share	unlisted
Tržište novca d.d.	Ordinary share	unlisted

During 2021, Tržište novca d.d. was liquidated. The amount of HRK 1.3 million was paid to the Bank from the Company's liquidation assets, the Bank's nominal contribution to the Company was HRK 0.7 million and the Bank made a net profit of HRK 0.6 million during the Company's liquidation which is included in other comprehensive income.

17. FINANCIAL ASSETS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME (CONTINUED)

(b) Debt securities

	31/12/2021	31/12/2020
Bonds of the Croatian Ministry of Finance	3,314	3,550
Foreign government bonds	<u>536</u>	<u>603</u>
Total listed securities	3,850	4,153
Treasury bills of the Croatian Ministry of Finance	1,053	1,373
Treasury bills of the National Bank of Hungary	<u>915</u>	<u>-</u>
Total unlisted securities	1,968	1,373
	<u>5,818</u>	<u>5,526</u>

The Bank classifies debt securities that it intends to hold for collection or sale, and which have met the requirements of the SPPI test, in financial assets measured at fair value through other comprehensive income. The SPPI test is performed on homogeneous groups of securities.

Treasury bills of the Republic of Croatia include short-term HRK and foreign currency long-term bills. In December 2021, the Bank purchased short-term treasury bills of the National Bank of Hungary.

Bonds of the Republic of Croatia include long-term HRK, currency and bonds in a currency clause.

In 2021 foreign government bonds include the long-term currency bonds Hungary and Romania (in 2020 the long-term currency bonds of Hungary and Romania).

2021

2020

Movement of gross carrying amount of debt securities:

	<u>Stage 1</u>	<u>Stage 2</u>	<u>Stage 3</u>	<u>POCI</u>	<u>Total</u>
Balance at 31 December 2019	6,094	-	-	-	6,094
Net (derecognition)/new approvals	(568)	-	-	-	(568)
Balance at 31 December 2020	5,526	-	-	-	5,526

Movement in loss allowance for expected credit losses through other capital reserves (Note 30):

	<u>Stage 1</u>	<u>Stage 2</u>	<u>Stage 3</u>	<u>POCI</u>	<u>Total</u>
Balance at 31 December 2019	6	-	-	-	6
Net increase / (decrease)	12	-	-	-	12
Increase due to parameter change (COVID)	1	-	-	-	1
Balance at 31 December 2020	19	-	-	-	19

18. FINANCIAL ASSETS MEASURED AT AMORTISED COST

	31/12/2021	31/12/2020
Bonds of the Republic of Croatia	-	17
Corporate Bonds	363	237
Corporate bills of exchange	2	2
	<u>365</u>	<u>256</u>
Loss allowance for expected credit losses	<u>(13)</u>	<u>(20)</u>
	<u>352</u>	<u>236</u>

In financial assets measured at amortized cost, the Bank classifies debt securities that it intends to hold for collection, and which have met the requirements of the SPPI test.

The SPPI test is performed on homogeneous groups of securities.

Receivables for unissued Bonds of the Republic of Croatia at 31 December 2021 refer to receivables arising from the purchase of socially-owned apartments for which the Republic of Croatia has never officially issued bonds, and accordingly the Bank made a 100% loss allowance for the entire amount of receivables.

In 2021, the Bank wrote off the entire amount of impairment receivables based on the Supreme Court Decision No. Rev 2842/13-2.

19. INVESTMENT IN SUBSIDIARIES (CONTINUED)

The investment in OTP osiguranje was classified in Note 24 *Assets held for sale* as at 31 December 2020. Changes in investments in subsidiaries are presented in detail in Note 1. During 2021, the Bank sold the mentioned Company for the amount of HRK 65 million. The sale was realized by payment to the Bank's transaction account. At the date of the sale of the Company, its total assets amounted to HRK 180 million (of which cash and cash equivalents in amount of HRK 53 million), liabilities HRK 115 million and equity HRK 65 million.

Cresco d.o.o. (activity: Real estate business) is 100% owned by OTP Nekretnine d.o.o. The investment cost of OTP Nekretnine d.o.o. to Cresco d.o.o. is HRK 17 thousand and the share of OTP Nekretnine in net assets is HRK 5 million (2020: HRK 5 million). SB Leasing d.o.o., in liquidation (activity: Finance and operating lease) is 100% owned by OTP Leasing d.d. The investment cost of OTP Leasing in SB Leasing is HRK 33 million (2020: HRK 33 million) and share of OTP Leasing d.d. in net assets is HRK 31 million (2020: HRK 25 million).

In 2021 subsidiaries did not receive dividends. In 2020 OTP leasing d.d. had receipts from SB Leasing d.o.o. in liquidation who paid the total profit for year 2019 in the amount of HRK 4,250 thousand and all retained earnings from 2011 to 2017 in the amount of HRK 6,852 thousand.

OTP Nekretnine d.o.o. in 2021, generated a total of HRK 28 million income (2020: HRK 25 million) and net profit for the year in amount of HRK 43 million (2020: HRK 2 million). OTP Invest d.o.o. in 2021, generated a total of HRK 8 million of income (2020: HRK 5.8 million), and a net loss for the year 2021 in the amount of HRK 0.1 million (2020: 1.5 million). OTP Leasing d.d. in 2021, generated a total of HRK 173 million income (2020: HRK 173.6 million), and a net income in amount of HRK 36 million (2020: HRK 31 million). In 2021 Georg d.o.o. generated HRK 5 million income and net profit in amount of HRK 1 million.

Investment property includes real estate not used by the Bank for operational purposes, but assets intended for sale or lease. The Bank shall reclassify the assets it intends to sell in accordance with IFRS 5 when all of the requirements prescribed by said IFRS are met. Assets held for sale are presented in Note 24. The total fair value of investment property is HRK 114 million (2020: HRK 63 million). Fair value is measured by independent up-to-date assessments of external appraisers. The fair value of investment property is measured using appraisals obtained from an independent external appraiser.

24. ASSETS HELD FOR SALE

The Bank reclassifies assets acquired in the course of collection to assets held for sale in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations.

	31/12/2021	31/12/2020
Investment in OTP Osiguranje	-	54
Real estate in the process of sale	-	25
Assets taken in exchange for uncollected receivables	-	5
Total assets held for sale	-	84

Due to the conditions that were met in 2020, investment in OTP Osiguranje d.d. was reclassified from Investments in subsidiaries (Note 19) to Assets held for sale (Note 24). Sale of investment in OTP Osiguranje d.d. has ended on 31 August 2021. Please refer to Note 1 and Note 19 for details.

Real estate in the process of sale includes real estate owned by the Bank that was used by the Bank for operational purposes, and during 2020, these assets meet all the requirements for classification as assets held for sale. Accordingly, the assets were reclassified from Property and equipment (Note 20) to Assets held for sale (Note 24).

The significant part of the Assets taken over in exchange for uncollected receivables is in the process of sale in 2020. For these assets, the conditions for classification into assets held for sale were met and accordingly reclassified from *Other non-financial assets* (Note 23) to *Assets held for sale* (Note 24).

Sale of Assets held for sale were realized in 2021 with the following effects presented in Note 7:

-sale of OTP Osiguranje d.d. in August 2021, realized profit in the amount of HRK 11 million

-sale of own real estate in July 2021, realized profit in the amount of HRK 0.8 million

- sale of foreclosed assets in exchange for uncollected receivables in January 2021, realized profit in the amount of HRK 0.2 million.

27. OTHER BORROWED FUNDS

	31/12/2021	31/12/2020
OTP Financing Malta	789	-
HBOR (Croatian Bank for Reconstruction and Development)	564	974
Ministry of Finance	-	3
Others	2	2
	<u>1,355</u>	<u>979</u>

Liabilities to OTP Financing Malta include funds borrowed for the purpose of maintaining the minimum Requirement for regulatory capital and liabilities (MREL) in accordance with EU regulations

Liabilities to the Croatian Bank for Reconstruction and Development (HBOR) include funds borrowed from HBOR are designated for approving loans to end-beneficiaries – corporate and retail customers – under the programmes supported by HBOR.

Other borrowed funds relates to the commitment to the Fund for financing employment growth in economically inadequately developed and highly migrant areas of the SFRY (former Yugoslavia) to finance employment growth in economically underdeveloped areas. The funds were intended for the establishment of private entities for the returnee from temporary work from the Federal Republic of Germany. These funds were transferred to banks, which were granted to individuals with the irrevocable guarantee of the Fund.

Notes to the unconsolidated financial statements (continued)

(All amounts are expressed in millions of HRK)

28. PROVISIONS FOR LIABILITIES AND CHARGES

	31/12/2021	31/12/2020
Litigation provision	327	290
Provision for severance and retention payments	54	83
Provision for unused vacations	10	12
Provisions for other liabilities	8	10
	399	395
Provisions for off-balance sheet items (Note 31)	75	103
	474	498

Litigation provision related to legal actions against the Bank, i.e. where the Bank is the defendant, amount to HRK 327 million (2020: HRK 290 million).

Provisions for litigation are calculated in accordance with IAS 37.

When forming provisions for litigation, the Bank also takes into account all criteria prescribed by the CNB's Decision on the obligation to make provisions for litigations conducted against a credit institution (Note 2.24 and Note 3).

Provisions for legal cases for loans in Swiss francs:

Provisions for legal cases regarding the CHF loans are presented within the litigation provisions and amount to HRK 117 million (2020: HRK 82 million). The increase in provisions compared to 2021 is the result of increased number of lawsuits against the Bank received during 2021. The Bank estimates each CHF loan lawsuit on an individual basis.

In relation to CHF cases, the Bank acts in a way that provisions for the sued unconverted cases are allocated according to the sued amount (VPS) upon receipt of the lawsuit, including legal penalty interest and costs in total amount, while converted CHF cases are not reserved, except in the case of a negative court decision for the Bank when provisions are allocated for these cases in accordance with the court decision.

The provisions recognised in the financial statements are measured using all currently available information and represent the best estimate of the obligations in light of significant uncertainties related to their timing and amount.

Events related to loans in Swiss francs

In September 2019 the Supreme Court of the Republic of Croatia made a ruling, which to a large extent confirms the earlier ruling of the High Commercial Court of the Republic of Croatia dated June 2018 in the case of protection of collective interest and rights of the consumers who had taken loans with principals indexed to Swiss franc (Ruling No. Rev- 2221/2018- 11 of the Supreme Court of the Republic of Croatia, hereinafter referred to as "the Ruling").

In February 2021 the Constitutional Court rejected the lawsuits of seven Croatian banks filed against the judgments of the Supreme Court of the Republic of Croatia and High Commercial Court of the Republic of Croatia in a collective dispute initiated by the Consumers Association over unfair provisions related to the Swiss francs.

In that sense, since the Supreme Court decisions, as well as the decisions of the lower courts are final and implemented by courts, there has been no increase in consumer rights (CHF loan client) or increase in liabilities on bank's side. The Bank is of the opinion that the decision of the Constitutional Court does not affect the positions of the parties involved in individual disputes that consumers have against banks. Bank's possible liabilities arising from decisions of competent courts related to such individual consumer lawsuits are considered as unpredictable liabilities.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

28. PROVISIONS FOR LIABILITIES AND CHARGES (CONTINUED)

Provisions for legal cases for loans in Swiss francs (continued)

In accordance with the provisions of paragraph 92 of IAS 37, additional information on unpredictable liabilities has not been disclosed as their disclosure may seriously prejudice the outcome of the aforementioned legal proceedings and the Bank's position in them.

Litigation provision

	2021	2020
Balance at 1 January	290	253
Paid out	(37)	(16)
Net charge to statement of profit or loss (Note 10)	74	53

	2021	2020
Balance at 1 January	83	110
Paid out	(29)	(27)
Net charge to statement of profit or loss (Note 9)	-	-
Balance at 31 December	54	83

Provisions for severance and retention payments in the amount of HRK 54million (2020: HRK 83 million) include provisions for:

- liabilities for employees based on restructuring HRK 43 million (2020: HRK 72 million)
- liabilities for severance and jubilee awards HRK 11 million (2020: HRK 11 million)

The cost of provisions in the amount of HRK 43 million were formed in accordance with IAS 37 on the basis of the restructuring plan which includes a detailed list of employees included in the plan, expenses to be incurred for each employee and implementation date. Provisions will be used during 2022 and 2023 until the final completion of the restructuring process. The Bank regularly on an annual basis monitors the plan implementation and, in accordance with the current situation, defines the future use of the reserved amount.

Provisions for severance and jubilee awards are formed in accordance with IAS 19. The costs of provisions under IAS 19 are presented in Note 9 *Employee costs*.

Provisions for other liabilities

	2021	2020
Balance at 1 January	10	10
Net charge to profit or loss (Note 10)	(2)	-
Paid out	-	-
Balance at 31 December	8	10

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

29. OTHER LIABILITIES

	31/12/2021	31/12/2020
Liabilities in respect of opening of accounts (escrow accounts)	129	12
Liabilities in respect of credit card operations	122	113
Accrued expenses for bonuses and other employee benefits	57	47
Accrued expenses – uninvoiced	39	56
Salaries and contributions payable	31	30
Liabilities towards suppliers	24	14
Accrued expenses for saving deposits insurance	17	15
Funds in the calculation	11	24
Liability for payments of deposits previously credited to income	12	11
Value added tax payable	4	3
Advances received	1	1
Liabilities for fees	1	-
Other liabilities	11	14
	<u>459</u>	<u>340</u>

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

30. SHAREHOLDERS' EQUITY AND RESERVES

SHARE CAPITAL

As of 31 December 2021 the share capital of the Bank consisted of 19,968,774 ordinary shares (2020: 19,968,774 ordinary shares), with a nominal value of HRK 200 each, which represents HRK 3,993,755 thousand of equity capital of the Bank (2020: HRK 3,993,755 thousand). All ordinary shares provide equal rights and carry one vote per share.

In 2021 the Bank has paid dividend for 2020 in amount HRK 251 million. The Bank's subsidiaries in the Republic of Croatia did not have any dividend payments during 2021 to the Bank.

SHARE PREMIUM

The premium on issued shares consists of premiums arising from the issuance of new ordinary shares from previous years in the amount of HRK 167 million and from the premiums arising from the purchase of own ordinary shares from previous years in the amount of HRK 4 million.

RESERVES

Other reserves

	31/12/2021	31/12/2020
Statutory reserves	305	199
Legal reserves	200	200
	<u>505</u>	<u>399</u>

The legal reserve has been formed in accordance with Croatian law, which requires 5% of the profit for the year to be transferred to this reserve until it reaches 5% of the issued share capital. The legal reserve, in the amount of up to 5% of the issued share capital, can be utilised to cover current and prior year losses. In addition, in accordance with the Bank's Statute, an additional reserve equivalent to the legal reserve has been created in an amount of up to 5% of the share capital for the purpose of covering impairment losses and for the same purposes as the legal reserve. Changes in other reserves are reflected in the Statement of changes in shareholders' equity.

Fair value reserves

	31/12/2021	31/12/2020
Reserve for measuring fair value of financial asset at fair value through other comprehensive income – equity instruments	38	35
Reserve for measuring fair value of financial asset at fair value through other comprehensive income – debt instruments	91	117
Expected credit losses on financial asset at fair value through other comprehensive income (Note 17)	12	19
Total fair value reserves:	<u>141</u>	<u>171</u>

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

30. SHAREHOLDERS' EQUITY AND RESERVES (CONTINUED)

Fair value reserves (continued)

Fair value reserve comprises unrealized gains and losses from the change in the fair value of financial assets through other comprehensive income.

Movement in the fair value reserves is as following:

Equity instruments

	2021	2020
Balance as of 1 January	35	59
(Decrease) / Increase in reserves	3	(30)
Tax	-	6
Balance as of 31 December of the current year	38	35

Decrease of reserves based on reclassification of VISA Series C shares amounts to HRK 33 million in 2020.

Debt instruments

	2021	2020
Balance as of 1 January	117	145
(Decrease) / Increase in reserves	(31)	(34)
Tax	5	6
Balance as of 31 December of the current year	91	117

General banking risks reserves

	31/12/2021	31/12/2020
General banking risks reserves	-	106
Other reserves	3	3
Total other reserves	3	109

According to earlier CNB regulations, the Bank had to create reserves for general banking risks if the increase in balance sheet and off-balance sheet exposures exceeded 15% of the corresponding balance sheet and off-balance sheet exposures of the previous year.

The general banking risk reserve was not transferable to retained earnings or other reserves, or otherwise distributable until the expiry of a consecutive three-year period from the period in which the Bank reported an annual growth over 15%. As the three-year period expired in 2011, the reserve was available to be utilised by the Bank as the Bank's retained earnings. Accordingly, by the decision of the Bank's General Meeting, the Bank transferred the reserves for general banking risks in the amount of HRK 106 million to the legal reserves of the Bank.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

30. SHAREHOLDERS' EQUITY AND RESERVES (CONTINUED)

Other reserves

Other reserves of the Bank refer to the funds collected on the bonds of the Republic of Croatia (Big Bonds from 2004).

Retained earnings

Retained earnings refer to the cumulative gains of the Bank retained in previous years adjusted for the dividend paid in 2021. In 2021 the Bank has paid dividend in amount HRK 251 million. Movement of retained earnings is presented in Statement of changes in shareholders' equity.

31. CONTINGENT LIABILITIES AND COMMITMENTS

	31/12/2021	31/12/2020
Guarantees	1,912	1,794
Letters of credit	73	33
Approved unused facilities and global lines	9,268	7,656
Factoring	838	204
Binding letters of intent	9	30
	12,100	9,717
Provisions for loss allowance for contingent liabilities and commitments	(75)	(103)
	12,025	9,614

2021

Movement of gross carrying amount:

	<u>Stage 1</u>	<u>Stage 2</u>	<u>Stage 3</u>	<u>POCI</u>	<u>Total</u>

Cash flow	(37)	(142)
Non-monetary items:		
<i>Interest</i>	-	2
<i>Exchange differences</i>	2	7
<i>Increase in liabilities</i>	36	-
Closing balance	<u>180</u>	<u>979</u>

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

33. CAPITAL RISK MANAGEMENT

The Croatian National Bank ("the CNB"), as the Bank's principal regulator, determines and supervises the capital requirements of the Bank as a whole. The amount of capital allocated to individual operations is based primarily on regulatory requirements. The allocation of capital to specific activities is performed independent of individuals in charge of those activities. Although the maximisation of return on the risk-weighted capital is the key basis used in determining the allocation of capital to the Bank's individual activities, it is not the only basis in the decision-making process. Synergies with other activities, availability of the Management Board and other resources, as well as the alignment of the activities with the Bank's long-term strategic goals are also considered. The directors review the Bank's capital management and allocation policies regularly.

The capital adequacy ratio is determined as the ratio of the regulatory capital to the risk-weighted assets, risk exposures, the overall uncovered exposures, foreign exchange risk and operational risk.

The Bank's regulatory capital amounts to HRK 6.170 million (2020: HRK 5,753 millions) and is composed entirely of the Common Equity Tier capital. The capital adequacy ratio is 19,85% (2020: 19,16%).

During 2021, the Bank met and complied with all of the regulatory requirements defining the maintenance of a sufficient level of capital to cover all risks and required capital buffers. The Bank confirmed its strong and stable capital position.

In accordance with Article 92 of Regulation (EU) No. 575/2013, the prescribed minimum capital ratios are the following:

- ✓ ordinary share capital rate in the amount of 4.5% of total risk exposure,
- ✓ share capital rate in the amount of 6% of total risk exposure,
- ✓ total capital rate in the amount of 8% of total risk exposure.

In addition to the minimum capital rates, the Bank is on an individual basis, in accordance with Articles 117, 118 and 130 of the Credit Institutions Act and Articles 129, 130 and 133 of the Directive 2013/36/EU, also obliged to comply with the following protective layers of ordinary share capital:

- ✓ a buffer for capital safeguarding in the amount of 2.5% of total risk exposure,
- ✓ a buffer for structural systemic risk in the amount of 1.5% of total risk exposure,
- ✓ a buffer for other systemic important institutions in the amount of 1% of the total risk exposure,
- ✓ an institution-specific countercyclical capital buffer.

Credit institutions are required to maintain an institution-specific countercyclical capital buffer equivalent to their total exposure amount calculated in accordance with Article 92 (3) of Regulation (EU) No. 575/2013, multiplied by the weighted average of the countercyclical buffer rates calculated in accordance with Article 140 of the Directive 2013/36/EU. Based on an analytical assessment of the evolution of systemic risks of a cyclical nature, the CNB has determined that the rate of the countercyclical capital buffer is 0%.

Based on the CNB Decision, the Bank has been identified as Other Systemically Important Credit Institution (OSI Credit Institution) on a consolidated and individual basis. Consequently, the Bank is also obliged to maintain a buffer rate for the OSI Credit Institution amounting to 1.5% of the total amount of risk exposure in the form of ordinary share capital on an individual and consolidated basis. However, as the Bank's parent credit institution is regarded as an OSI Credit Institution which is the EU's parent credit institution and to which the buffer layer for the OSI Credit Institution is applied on a consolidated basis, and the buffer rate that the Bank must maintain is 1%. The stated buffer rate for the Bank is the sum of the buffer rate applied to the group on a consolidated basis (0%) and 1% of the total amount of risk exposure.

The Bank's regulatory capital and capital rate have been calculated in accordance with the requirements of the European Banking Authority (hereinafter: EBA) and the national discretion of the CNB and are presented in the table below.

34. CREDIT RISK

The Bank is exposed to credit risk, which is the risk that the counterparty will not be able to settle in full the amounts owed as they fall due. The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to a single borrower, or a group of borrowers and industry segments. The Bank monitors the risks and reviews them on an annual or more frequent basis. The exposure to credit risk for all assets is limited by the carrying amount of each asset reported in the statement of financial position. The exposure to credit risk of derivatives which relate to foreign currencies is equal to the sum of the positive current market value of the underlying contract and the potential exposure to the counterparty risk. Additionally, the Bank is exposed to credit risk on off-balance-sheet items, which include undrawn commitments to extend credit, issued guarantees and letters of credit.

The Bank manages its exposure to credit risk by regularly analysing the ability of the borrowers and potential borrowers to repay interest and principal and by revising the credit limits, where necessary, or obtaining collateral, corporate or personal guarantees.

As the year 2020 was marked by COVID 19 pandemic and devastating earthquakes, the Bank was acted in accordance with EBA guidelines by approving moratoriums and other types of restructuring using the appropriate classification, both upon approval and in ex-post evaluation. During 2021, regular monitoring of the moratorium and regularity in repayment after the expiration in the segment of legal entities and citizens continued.

	Note	31/12/2021		31/12/2020	
		Gross exposure	Net exposure	Gross exposure	Net exposure

34. CREDIT RISK (CONTINUED)

Collateral and other forms of credit risk insurance

The Bank in its internal policies defines conditions under which certain collaterals, which serve to reduce credit risk, are acceptable, and methods of their initial and subsequent regular valuation.

The basic types of acceptable collaterals that are accepted with value are:

- for corporate lending: cash, state guarantees, bank guarantees, real estate, movable property, transfers of state claims, insurance policies.
- for lending to private persons: cash, real estate, insurance policies.

The Bank also accepts corporate guarantees and interests in corporations that are accepted with value only under certain conditions and letters of comfort from parent companies for loans granted to subsidiaries, shares in companies and operational security instruments such as debentures and bills of exchange, which are not accepted with value.

As of 31 December 2021, the total value of collateral held by the Bank as collateral for loans and advances and contingent liabilities and commitments amounts to HRK 38,628 million (2020: HRK 35,149 million).

Total allocated value of collaterals as of 31 December 2021 amounts to HRK 19,207 million (2020: HRK 16,379 million).

The tables below present maximum exposure to credit risk by category of financial assets, total market value of collateral allocated, the remaining collateral available (to the extent to which the total market value of the collateral is greater than the exposure to which it refers) and the maximum exposure after deducting the allocated collateral value.

34. CREDIT RISK (CONTINUED)

Allocated value of collaterals for balance sheet and off-balance sheet asset items is presented as the market value net of previous liabilities without applying haircut, in such a way that it is spread up to the maximum amount of exposure of an individual placement. If the value of the collateral at the level of placement is greater than the total exposure of the placement, the excess, that is, the value of the collateral above the gross exposure is summarized (all types of collateral) in a separate column. If a single placement is covered by multiple types of collateral with a value, and one type of collateral is sufficient to cover the entire gross exposure of the placement, the allocated value of that single collateral is shown, and the value of other collateral in that placement is shown in the item above the gross exposure amount. The allocation priority by type of collateral is determined as follows:

- Deposits
- Real estate
- Guarantees
- Other

Deposits

A deposit (term deposit or blocked amount in the Bank's transaction account) as a collateral is a special type of pledged assets from which the Bank is entitled to settle their claims in the event of the debtor defaulting, whereby the Bank shall collect their debt directly, without the enforcement procedure. If the deposit does not meet all the necessary conditions, the financial pledge can be seized through court proceedings or in other (out-of-court) procedures, which are not deemed as direct collection. When the liability ceases to exist, the control over the deposit shall be restored to the debtor or the collateral issuer.

Real estate

Real estate taken as collateral by the Bank may be residential or non-residential. Residential real estate: real estate (share in property) for residential purposes entered or to be entered in the real estate register as residential houses or apartments, together with associated land, provided that the relevant building permit is issued or, in case of simple structures, only an official certificate of construction, which is or will be occupied or rented by the owner. All other real estate belongs to the category of non-residential real estate. Real estate can only be pledged by mortgaging. The mortgage can be entered in the land registers for the real estate as a whole or in case of real estate in regulated co-ownership parts for the entire portion belonging to a co-owner.

When granting standard housing loans, particular emphasis is placed on limiting production based on the LTV (Loan to value) indicator, which represents the ratio between the exposure and the market value of the mortgaged real estate. Eligible LTVs can be up to 100%, where a maximum of 45% of total placements can be with an LTV ratio of over 80%, only for the best locations in Croatia that are determined based on the economic strength statistics, tourism potential and real estate sales in individual cities and municipalities. In addition, production is limited to 5% of loans with an LTV of more than 90% and 2% of loans with an LTV of more than 95%.

Furthermore, it is also important to note that the value of real estate in the pledged portfolio is regularly monitored and updated in the collateral system on basis of statistics data for all types of real estate where application is possible such as apartments, family houses, apartments, offices, shops, etc. OTP real estate experts checks the value for other types of real estate where the application of statistical data is not possible. When applying statistics, the value correction can only be performed to lower, never to higher. Loans with a foreign currency clause can only be approved for loans with LTV rates of up to 90%, except for clients with a currency of receipt equivalent to the loan currency.

Furthermore, since they are non-purpose, mortgage loans have additional restrictions on the amount, term and LTV indicator of maximum up to 62.5% in the best (Prime 1 and 2), and a maximum of 43.5% in worse locations (Non prime and Sub prime).

Notes to the unconsolidated financial statements (continued)

(All amounts are expressed in millions of HRK)

34. CREDIT RISK (CONTINUED)

Guarantees

The Bank accepts the following guarantees to secure its claims, each of which may be absolute (unconditional) or contingent (conditional):

- ✓ Bank guarantee/confirmed letter of credit
- ✓ Company guarantee
- ✓ Personal guarantee (guarantors)/joint guarantee (co-debt).
- ✓ Special forms of guarantee
 - Guarantee by the Croatian Agency for SMEs, Innovations and Investments (HAMAG)
 - Guarantee by the Government of the Republic of Croatia and the Croatian National Bank
 - Guarantee by OECD member states, their central banks
 - Guarantee of local self-government units of the Republic of Croatia
 - Guarantee by HBOR (including insurance policy) and international development banks.

The guarantee must, as a rule, be unconditional and irrevocable (written guarantee statement/guarantee agreement, with "on first demand" and "no objection" clauses, without additional conditions). An exception is the HAMAG guarantee, where conditional guarantees, up to the amount of the guarantee, also have collateral value.

Other

The Bank also accepts the following types of collateral for its claims:

- ✓ machines
- ✓ equipment
- ✓ personal and commercial vehicles
- ✓ stocks
- ✓ airplanes
- ✓ naval vessels, floating and stationary coastal structures, yachts and boats, inland navigation vessels
- ✓ other movable property (patents, trademarks, and similar)
- ✓ securities
- ✓ cessions

With these types of collateral, particular attention is paid to checking whether the pledger owns the lien or not. With the exception of floating objects and civil aircraft whose ownership is recorded in official registers, the lienor must in any case provide credible proof of the origin of the lien (original invoice, customs documents, supporting documents, comparison of the markings on these documents with the marking on the property, etc.).

35. MARKET RISK

MARKET RISK IN TRADING BOOK

Market risk is the effect of external influences on the value of positions in the Bank's portfolio due to changes in prices or fluctuations in the financial markets. Market risk, by that definition, consists of:

- Currency risk
- Interest rate risk and
- Price risk

The basic objective of market risk management in the Trading Book is to make profit by taking advantage of fluctuations in exchange rates and interest rates, which means limiting losses that may result from their adverse fluctuations so as not to endanger the profitability and operation of the Bank.

The market risks in the Trading Book to which the Bank is exposed are managed by an organizational unit named Treasury Department which has the status of an active Treasury and thus can leave open positions in the Trading Book, which are the result of the banking activity itself, and further engage in speculative trading in order to realize a positive financial result.

The products included in the Trading Book are as follows:

- FX spot
- FX forward
- FX swap
- Money market transactions (loans and deposits)
- Bonds (Republic of Croatia)
- Interest rate swaps (IRS)

The Market Risk Department is responsible for daily monitoring and reporting of market risk exposures in the Trading Book, control of all positions for which there is market risk exposure and compliance with the limits adopted by the Management Board, at the proposal of the Assets and Liabilities Committee of OTP Bank Nyrt. The limits are revised and approved on an annual basis, the amount of which is determined by the Bank's business policy and market conditions, as well as by the policy of the OTP Bank Nyrt as a whole.

The Asset and Liability Management Department is responsible for managing the Bank's remaining foreign exchange position, which is the difference between the Bank's total foreign exchange position (as measured by the regulatory report - currency risk) and the open foreign exchange positions of the Treasury Department. Due to the fact that, in accordance with the internal rules, the Asset and Liability Management Department has no limit for foreign currency risk exposure, the subject position is closed daily.

Value at Risk (VaR)

VaR is an estimate of the maximum amount that a portfolio, with a defined level of confidence and for a defined period, can lose from its value.

VaR is calculated for a holding period of one day and with a confidence level of 99%, using a historical simulation method based on a 252-day observation period.

Defining the VaR limit provides a risk measurement tool designed to limit potential losses of the Bank and in case of turbulent market conditions in a way that encourages closing of positions amid increased market uncertainty.

In 2020 due to the change in the structure of the limit, the calculated VaR values for FI (Fixed Income) and MM (Money Market) desk were monitored separately.

35. MARKET RISK (CONTINUED)

FOREIGN EXCHANGE (FX) RISK IN TRADING BOOK

FX risk is the risk that arises from changes in the exchange rate and causes fluctuations in a particular financial instrument and is continuously monitored through an open FX position (daily and intra-daily) in each currency managed by the organizational unit of the Treasury Department. Exposure to the FX risk or open FX position is the difference between assets and liabilities expressed in foreign currency or linked to the foreign currency. Open FX position can be long or short, depending on whether the FX risk exposure is greater on asset (long position) or liabilities (short position).

The Bank's internal rules set the maximum allowed open position in individual currencies and open FX position limit on global level. Position limit is maximum allowed exposure of individual position that can be held or traded. Net open position is sum of individual open positions (difference between long and short position), while gross position is absolute sum of individual open positions.

Fluctuations of open foreign exchange position by major currencies (in HRK million)

	<u>Minimum</u>	<u>Average</u>	<u>Maximum</u>	<u>End of year</u>
2021				
EUR	0.2	56.8	377.1	1.9
USD	0.0	0.3	1.8	0.1
CHF	0.0	0.2	0.7	0.0
Global foreign exchange position	1.7	58.5	378.5	2.7
2020				
EUR	0.6	40.1	166.9	4.7
USD	0.0	0.2	0.6	0.0
CHF	0.0	0.1	0.7	0.1
Global foreign exchange position	1.0	41.1	167.7	5.5

The Asset and Liability Management Department is responsible for managing the Bank's remaining foreign exchange position, which is the difference between the Bank's total foreign exchange position (as measured by the regulatory VR report) and the Treasury Department's open foreign exchange position. Due to the fact that in accordance with internal rules, Asset and Liability Management Department has no limit for foreign currency risk exposure, the subject position is closed daily.

The currency structure of total assets and liabilities is shown in the tables below.

35. MARKET RISK (CONTINUED)

INTEREST RATE RISK IN TRADING BOOK

Interest rate risk is the risk of changes in the fair value of a financial instrument due to changes in market interest rates.

The Bank is allowed to trade / hold only those interest rate risk instruments for which there is valid approval of the Management Board, at the proposal of the Asset and Liability Management Committee of OTP Bank Nyrt, and if there are valid and sufficient limits.

Interest rate risk limits limit the Treasury's exposure to bonds, interest rate swaps (IRSs), Forward rate agreements (FRAs), repo deals and other derivative transactions containing interest rate risk.

Risk is measured by calculating the change in the net present value of the portfolio in the event of a shift in the reference interest rate curve by 1 basis point and is limited by the BPV (Basis Point Value) limits.

The tables below show the sensitivity to change in interest rate where the increase in the net present value of all future cash flows is shown as a positive number and a decrease as a negative number.

In 2020, in order to better monitor interest rate risk by type of transaction, the limit structure was changed and BPV values were monitored and calculated separately (below is the view for MM and FI desk)

Overview of sensitivity to changes in interest rates of 1 basis point per currency (in HRK thousand)

35. MARKET RISK (CONTINUED)

INTEREST RATE RISK IN BANKING BOOK

Interest rate sensitivity of assets and liabilities

Interest rate risk represents the exposure of Bank to unexpected or unfavourable fluctuations of market interest rates in the future. Interest rate risk has an impact both on the profit and loss account and on future cash flows and the market value of the Bank's assets, liabilities and off-balance sheet instruments.

The purpose of interest rate risk management is to protect the Bank from unacceptably high interest rate risk exposure, but acceptable exposure to interest rate risk is defined by the amount of individual limits that the Bank establishes through the ratio of the amount of potential loss and regulatory capital, as well as based on the ability and desire of OTP Bank to take interest rate risk.

Bank separately manages the interest rate risk arising from the trading book items from the interest rate risk arising from the following transactions included in the banking book:

- commercial business (loans and deposits from clients);
- own account transactions (which include instruments of financial assets measured at fair value through other comprehensive income and a portfolio of financial assets measured at amortized cost);
- interbank transactions;
- derivatives concluded for the purpose of banking book (e.g. interest rate swaps);
- other transactions that affect the interest rate risk in the banking book.

The management of structural interest rate risk arising from items in the banking book is the responsibility of the Asset and Liability Management Department, which is part of the Bank's Financial Sector.

The methods used to measure interest rate risk exposure are as follows:

- Net interest income (NII)
The evolution of net interest income is modelled over a particular time horizon (1 year in case of ICAAP) considering at least the interest rate shock scenarios predefined by EBA (described in later paragraphs), assuming a going-concern perspective and constant balance sheet. The effects of both automatic and behavioural options are taken into account.
In calculation of the total impact on NII up to 1 year, the positive effects are weighted by 50%.
- Economic value of equity (EVE)
The present value of equity, and the change in the present value of equity between the base scenario and the interest rate shock scenarios are determined on the basis of transaction level cash flows discounted by the risk-free yield curve for each currency. Cash flows of on- and off- interest bearing assets (with the exclusion of non-performing loans) and liabilities are projected without commercial margin. Contractual repricing characteristics are modified according to the behavioural assumptions, taking into account the restriction on the average duration of retail, corporate and municipal non-maturing deposits being a maximum of 5 years.

When calculating the total impact on EVE, the positive effects are weighted by 50%. For each currency, the lower limit of the post-shock interest rate is applied, depending on the maturity, starting from -100 basis points for current maturities. This lower limit increases by 5 basis points per year and eventually reaches 0% for maturities of 20 years and over.

The Bank is required to apply six interest rate shock scenarios to cover parallel and non-parallel gap risks to the economic value of equity (EVE):

1. Parallel up
2. Parallel down
3. Steepener (short rates down and long rates up)
4. Flattener (short rates up and long rates down)
5. Short rates up
6. Short rates down

35. MARKET RISK (CONTINUED)

INTEREST RATE RISK IN BANKING BOOK (CONTINUED)

Interest rate risk management as required by the Croatian National Bank

In accordance with the Decision on Supervisory Reports of Credit Institutions, the Assets and Liabilities Management Department prepares the following reports on a quarterly basis:

- Change in the economic value of the credit institution's capital - contracted cash flows - fixed interest rates (EVK UNT FKS),
- Change in the economic value of the credit institution's capital - contracted cash flows - variable interest rates (EVK UNT PKS),
- Change in the economic value of the credit institution's capital - baseline scenario - fixed interest rates (EVK OS FKS),
- Change in the economic value of the credit institution's capital - baseline scenario - variable interest rates (EVK OS PKS),
- Change in the economic value of the credit institution's capital - net discounted positions by scenarios (EVK NDPS),
- Aggregate change in the economic value of the credit institution's capital (EVK ZBR) i
- Impact of interest rate risk in the book of non-traded positions on net interest income (NIR).

These reports are prepared separately for each significant currency, on an individual and consolidated basis. The Bank calculates the aggregate change in EVE for each interest rate shock scenario where the amount in a currency that gives a positive change in EVE is weighted at a weight of 50%.

In accordance with the Decision on the Supervisory Reports of Credit Institutions, the Bank shall immediately inform the Croatian National Bank:

- If the drop in EVE per regulatory shock (+/- 200 bb) is greater than 20% of regulatory capital,
- If the EVE decline is greater than 15% of share capital under any of the six additional interest rate shock scenarios.

In 2020 the Bank applied the methodology for calculating the impact of interest rate risk on the economic value of capital defined by the Decision on interest rate risk management in the Bank's Book (OG 120/2016 and 14/2017). From 2021, the Bank has harmonized its methodology for calculating and monitoring interest rate risk with the new regulatory framework defined by the Decision on Supervisory Reports of Credit Institutions (OG 41A / 2014, 127/2014, 67/2015, 119/2015, 7/2017, 44/2017, 120/2017, 85/2018, 47/2019, 14/2020, 59/2020 and 122/2020). The regulatory framework was amended to implement the EBA Guidelines on the Management of interest rate risk arising from transactions in the non-trading book activities.

An overview of the Bank's sensitivity to interest rate fluctuations measured in accordance with regulatory reporting requirements at 31 December 2021 is indicated in the table below:

Scenarios	EVE
Regulatory +200 bp	(384)
Regulatory -200 bp	75
Parallel shock growth	(438)
Parallel shock falls	74
Mowing shock	(189)
Compensation shock	50
Shock of short-term interest rate growth	(100)
Shock of falling short-term interest rates	92
Regulatory capital	6,170
(CHANGE IN ECONOMIC VALUE - regulatory shock / REGULATORY CAPITAL) * 100	6.22%
Share capital	6,170
(CHANGE IN ECONOMIC VALUE - 6 additional shocks / SHARE CAPITAL) * 100	7.10%

35. MARKET RISK (CONTINUED)

INTEREST RATE RISK IN BANKING BOOK (CONTINUED)

Interest rate risk management as required by the Croatian National Bank (continued)

Pursuant to the Decision on managing banking-book interest rate risk, which was in force for reporting date 31 December 2020, the Bank is obliged to apply the higher level of:

- 1) standard interest-rate shock represented by a parallel positive or negative shift in interest rates by 200 basis points, applying the lower level of rate of 0%, except for the cases in which there is negative interest rate or
- 2) internally calculated changes of economic value calculated as 1st and 99th percentile attributable daily changes of interest rates during the period of 5 years scaled to a year that lasts 240 days.

An overview of the Bank's sensitivity to interest rate fluctuations measured in accordance with the statutory reporting requirements as at 31 December 2021 is indicated in the table below:

Change in the economic value of the banking book_parallel shift in interest rates by +/- 200 bp

	Up to 1 year	1 to 3 years	3 to 5 years	5 to 7 years	7 to 10 years	over 10 years	Total
Gap in HRK	821	3,437	1,704	(168)	(46)	19	5,767

Amounts due to customers	0.0	0.1
Other borrowed funds	1.2	1.3

PRICE RISK IN TRADING BOOK

Price risk is the risk of change in the value of an instrument as a result of changes in market prices, and the Bank invests primarily in high quality government instruments, therefore the Bank considers the price risk to be low.

36. LIQUIDITY RISK

Liquidity risk management

Cash flow management policy aimed at maintaining a balance between cash receipts and expenses is part of the Bank's wider asset and liability management policy. To ensure a satisfactory level of liquidity reserves, the Bank consistently implements the cash flow monitoring and planning process and anticipates future liquidity needs taking into account changes in the Bank's economic, legislative and other circumstances. This planning involves identifying known, expected and potential cash outflows and developing strategies to meet the Bank's liquidity requirements in certain currencies. It is important to emphasize that the Bank, when managing its liquidity risk, seeks to ensure the currency matching of the liquid assets' portfolio with the currency distribution of its net liquidity outflows.

Bank's liquidity risk management is the responsibility of the Asset and Liability Management Division in the Financial Sector. The Asset and Liability Committee (ALCO) determines the Bank's liquidity risk tolerance, regularly reviews and approves the liquidity risk management strategy and ensures the effective management of liquidity risk by the Asset and Liability Department. The Asset and Liability Department also proposes a liquidity risk management strategy and establishes a framework for managing these risks to ensure that the Bank has sufficient liquidity and regularly reports to ALCO. In addition, the Asset and Liability Department manages liquidity and reserve requirements with the CNB on a daily basis, maintains liquidity reserves in order to meet prescribed requirements and internal limits, and, in addition, implements the ALCO-approved liquidity risk strategy and ensures that appropriate controls, procedures and information flows are in place. In addition to short-term liquidity, the Asset and Liability Department is also responsible for managing medium and long-term liquidity, and adopts operational decisions based on information provided to them by various Bank departments related to operations that affect liquidity.

The operational management of the foreign exchange liquidity of the OTP Bank in Croatia is centralized and is managed according to the concept of the Liquidity pool of the Parent Company. Under this framework, OTP Bank Nyrt Hungary retains a liquidity buffer in case of a liquidity shock (deposit or business-related shock) and for financing the regular operations of the Bank. Unlike foreign currency liquidity, the operational management of the HRK liquidity of the Bank is the responsibility of each individual member company.

In order to ensure liquidity stress resilience, the Bank maintains an adequate reserve of high-quality assets that can be sold or pledged to obtain funds under stress conditions.

Highly liquid financial assets include:

- liquid assets on accounts with the Croatian National Bank (balance of assets on the giro account and foreign currency settlement account with the CNB minus the obligatory reserve requirement);
- liquid assets placed with banks;
- liquid assets placed in securities that are measured at fair value through other comprehensive income

In addition to the aforementioned, the short-term and long-term financing lines offered by the Parent Company in foreign currency, which, together with customer deposits, represent the Bank's sole sources of financing should be taken into account in the liquidity buffer.

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

36. LIQUIDITY RISK (CONTINUED)

Maturity structure of securities representing the Bank's liquidity reserve as at 31 December 2021 and 31 December 2020 is indicated in the tables below:

31/12/2021

	Total	Up to 1 year	1 to 3 years	3 to 5 years	Over 5 years
Bonds of the Republic of Croatia	3,314	424	1,144	1,108	638
Foreign government bonds	536	-	536	-	-
Treasury bills of the Republic of Croatia	1,053	1,053	-	-	-
Bills of the National Bank of Hungary	915	915	-	-	-
Liquid assets placed in securities	5,818	2,392	1,680	1,108	638

31/12/2020

	Total	Up to 1 year	1 to 3 years	3 to 5 years	Over 5 years
Bonds of the Republic of Croatia	3,549	545	1,286	875	844
Foreign government bonds	603	76	527	-	-
Treasury bills of the Republic of Croatia	1,373	1,373	-	-	-
Liquid assets placed in securities	5,525	1,994	1,813	875	844

Bank assets are considered encumbered if they are pledged or subject to any form of contract to secure, hedge or enhance the lending of any balance sheet or off-balance sheet transactions from which they cannot be freely withdrawn (for example, to pledge for funding sources). Pledged assets subject to withdrawal restrictions, such as assets requiring prior approval prior to withdrawal or replacement with other assets, are considered encumbered. As at 31 December 2021, the Bank had no impaired asset burden other than the mandatory reserve of HRK 2,205 million (2020: HRK 1,906 million). Existing sources of financing were sufficient to cover the Bank's liquidity needs.

Liquidity risk measures

In order to comply with the legal and internal regulations and decisions, establish the principle of safety and stability and achieve the planned profitability of operations, the Bank applies a system of measuring and limiting liquidity risk and reporting of the subject risk. In accordance with the market practices, exposure to liquidity risk is determined through:

- regulatory limits
- internal limits

The Bank has the obligation to maintain the following regulatory liquidity indicators:

- mandatory reserve
- percentage coverage of foreign currency liabilities with short-term foreign currency claims
- liquidity coverage ratio
- requirement related to stable sources of funding

Mandatory reserve

CNB prescribes to banks the obligation to allocate and maintain mandatory reserves, in the form of deposits with the CNB, as well as other liquid claims.

As at 31 December 2021, the mandatory reserve rate was 9% of the prescribed basis and remained unchanged compared to 31 December 2020. The basis of the calculation is the average monthly balance of current accounts and deposits, loans and repo transactions received, debt securities issued, and hybrid and subordinated instruments.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

36. LIQUIDITY RISK (CONTINUED)

Pursuant to regulatory provisions, the allocation of the HRK mandatory reserve component amounted to 70%, while the allocation of the foreign currency mandatory reserve component amounted to 0%. In addition to the prescribed 70% of the mandatory reserve requirement in HRK on the account of the CNB, banks are obliged to maintain the remaining 30% through the average daily balance on settlement accounts and on accounts for coverage of negative balances on settlement accounts in the National Clearing System. This includes 75% of the foreign currency mandatory reserve required to be held by the Bank in HRK and added to the HRK mandatory reserve.

The decision of the CNB of 15 December 2015 ended the obligation to allocate the foreign currency mandatory reserve, i.e. enabled the banks to maintain the total foreign currency mandatory reserve with an average daily balance:

- of the liquid foreign currency claims from OECD member states and credit institutions in OECD countries with the lowest ratings by Standard Poor's and Fitch Ratings of: AA-, respectively by Moody's: Aa3,
- of the funds in the own euro settlement accounts with the Croatian National Bank; and
- of the foreign cash and checks denominated in foreign currency.

With the same decision, the CNB introduces an obligation for all banks, except savings banks, to maintain at least 2% (of the total foreign currency portion of the mandatory reserve requirement) in their own foreign currency euro settlement account with the CNB, or own PM account within the TARGET2-HR system.

The Croatian National Bank does not pay a fee on HRK mandatory reserves. Interest rate to applied to the special account for a portion of the foreign currency reserve requirement that the Bank is obliged to maintain (PM account within the TARGET2-HR system) is the reference interest rate of the European Central Bank.

Percentage coverage of foreign currency liabilities with short-term foreign currency claims

Pursuant to the Decision on minimum required foreign currency claims, the Bank is required to maintain the prescribed ratio between certain short-term foreign currency receivables and foreign currency liabilities on a daily basis.

Since March 2011, the minimum prescribed ratio between short-term foreign currency receivables and foreign currency liabilities is 17%.

The maintenance of the stated ratio as at 31 December 2021 and 31 December 2020 for the Bank is indicated in the table below:

	31/12/2021	31/12/2020
Short-term foreign currency claims	4,420	4,680
Foreign currency liabilities	21,917	20,661
Minimum required foreign currency claims (%)	20.17%	22.65%
Regulatory limit	17.00%	17.00%
Internal minimum	17.25%	17.25%
Internal optimum	17.75%	17.75%

(All amounts are expressed in millions of HRK)

36. LIQUIDITY RISK (CONTINUED)

Liquidity coverage ratio

In accordance with the Regulation 575/2013 of the European Parliament and the Delegated Commission Regulation (EU) No. 2015/61, the Bank is required to maintain the prescribed ratio of liquid assets and net liquid outflows (LCR) to a minimum of 100% since January 2018.

The liquidity coverage ratio (LCR) request as at 31 December 2021 and 31 December 2020 for the Bank is indicated in the table below:

	31/12/2021		31/12/2020	
	Amount	Weighted amount	Amount	Weighted amount
Liquidity buffer (HQLA)	9,329	9,300	7,634	7,607
Cash and reserves with the Central Bank	4,216	4,216	1,924	1,924
Total 1st and 2nd degree assets	5,113	5,084	5,710	5,683
Total net liquidity outflows	43,521	5,136	37,022	3,620
Inflows	4,045	3,314	3,872	3,356
Cash receivables from non-financial clients	1,403	735	955	508
Cash receivables from financial clients	1,558	1,558	2,734	2,734
Other inflows	1,084	1,021	183	114
Outflows	47,566	8,450	40,895	6,977
Retail deposits	29,922	2,405	26,389	2,124
Non-operational deposits	8,551	4,460	7,459	3,988
Other liabilities	9,093	1,585	7,047	865
Liquidity coverage ratio (%)_LCR	181%		210%	
Regulatory limit	100%		100%	
Internal minimum	110%		110%	
Internal optimum	120%		120%	

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

36. LIQUIDITY RISK (CONTINUED)

When managing a liquidity buffer in terms of a Liquidity Coverage Ratio requirement (LCR), and in order to ensure the security, liquidity and adequate diversification of its own investments, the Bank is guided by the requirements set out in Delegated Commission Regulation (EU) No. 2015/61 as well as by the provisions of the Bank's Liquidity Risk Management Procedure regarding the investment portfolio management. Accordingly, the management of the liquid assets portfolio recognized in the liquidity buffer includes:

- minimizing credit risk or loss risk due to default of the security issuer (or guarantor) by (i) pre-determining and constantly monitoring the issuers whose securities have already been purchased or can be purchased and (ii) diversifying the portfolio and limiting the investment by issuer so that the potential losses of individual securities are minimized,
- minimizing the risk of the market value of the securities in the portfolio decreasing due to changes in general interest rates, taking into account (i) that the portfolio is structured so that the securities mature in order to meet the cash requirements for current operations, avoiding the need to sell securities on the open market before maturity with a high transaction cost and (ii) investing operating assets primarily in short-term securities (limiting the maximum maturity or duration of the portfolio),
- not opening currency risks related to the portfolio of liquid foreign currency assets,
- achieving a competitive rate of return, given the constraints on credit, interest rate and currency risk mitigation and liquidity goals,
- portfolio diversification to reduce the risk of loss resulting from the concentration of assets in a particular type, currency, country or economic sector,
- assessing the marketability of the portfolio primarily through the possibility of collateralizing with the Croatian National Bank or the European Central Bank and then by examining the market situation of professional services at the Bank.

Requirement for stable sources of funding

Regulation (EU) 2019/876 of 20 May 2019 amending Regulation (EU) no. 575/2013 regarding the leverage ratio, the ratio of net stable sources of financing, regulatory capital requirements and eligible liabilities, counterparty credit risk, market risk, exposure to central counterparties, exposure to collective investment undertakings, large exposures, requirements for reporting and disclosure, prescribes the bank's obligation to report on stable sources of financing (NSFR) whose minimum level is 100%.

Changes in net stable funding ratio requirements (NSFR) as at 31 December 2021 and 31 December 2020 for the Bank is indicated in the table below:

	31/12/2021	31/12/2020
Items providing stable funding sources	38,545	34,417
Items requiring stable funding sources	27,912	26,403
Net stable funding ratio requirements (%)_NSFR	138%	130%
Regulatory limit	100%	100%
Internal minimum	110%	110%
Internal optimum	120%	120%

In addition to the regulatory liquidity ratios indicated above, the Bank also uses a number of other internal indicators to help monitor short-term and long-term liquidity risk exposures based on the balance sheet structure (such as the net loan-to-deposit ratio, the share of liquid assets in total assets, the concentration of deposits received from an individual client and twenty largest depositors, and projected funding needs).

The aforementioned internal liquidity indicators are monitored through ALCO and daily reports in accordance with the defined reporting dynamics.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

36. LIQUIDITY RISK (CONTINUED)

Stress testing

In order to meet the expected and unexpected cash needs, the liquidity management strategy includes planning for contingencies (local and global crises). Namely, the planned activities are continuously adjusted to the market situation, taking into account the structure of assets and liabilities and the maximum level of liquidity reserves.

The Bank prescribes and carries out stress tests of its liquidity, taking into account the factors specific for the Bank (crisis of the institution) as well as market factors (market crisis). Tests are conducted for shorter and longer periods of stressful circumstances with varying intensity of stressful circumstances: from normal (predictable or normal) circumstances to unusual (extreme) circumstances.

On a monthly basis, the Bank performs liquidity stress testing to determine and quantify its exposure to potential liquidity stress, analyzing potential effects on its liquidity position.

Stress tests consist of applying assumptions of development inside and outside the budget to inflows and outflows of client funds (with particular attention being paid to the concentration of deposits) and determining the net outflows of client funds under stress, which are compared to the liquid assets that can be obtained using the liquidity reserve and alternative sources of financing.

37. OPERATIONAL RISK

Operational risk is the risk of loss resulting from inadequately defined or improperly executed business process, human error, inappropriate system operation or as a result of external factors, including legal risk.

The Bank's activities in the area of managing operational risk are in line with the applicable regulations and good operational risk management practice, and are regularly revised to reflect any changes therein. Framework for managing operational risk at the Bank is provided by the Operational Risk Management Rules, the Operational Risk Collection Procedure as well as the Procedure for Managing Key Risk Indicators, Procedure for conducting risk self-assessment and control mechanisms, Procedure for listing model risks, Procedure for conducting scenario analysis.

The Bank defined the business continuity management strategy: Business Continuity Plan, as well as the Crisis Communication Handbook, that define the system supporting the continuity of operations in cases where they become temporarily discontinued as a result of an exceptional event.

Operational risks are managed in a decentralised manner so that the responsibility for managing operational risks rests with the managers and staff in charge of those organisational units in which operational risks are inherent to the activities performed by those units. They best understand, control and monitor the processes taking place in their organisational units and their duty is to ensure that the processes they manage follow appropriate procedures and are safe from the aspect of incurrence of operational risks. Operational risk management activities that are a joint responsibility of all the Bank's organisational units include the following: identification, measurement, assessment and analysis, as well as monitoring operational risks.

Department for Operational Risks and Business Continuity Management operates as an independent unit within the Risk Management Sector, Department for Operational Risk Management. Department for Operational Risks and Business Continuity Management is responsible for: suggesting the set-up of the operational risk management environment and the rules governing this area, for collecting data about losses caused by operational risks, conducting analysis, documenting and preparing reports on operational risk events and providing assistance and support to all organizational units of the Bank in understanding the structured approach to managing operational risks.

In line with the decentralised operational risk management methodology, process owners are responsible for consistent identification and assessment of operational risks, followed by the establishment and implementation of measures for managing risks identified in the respective areas and processes for which they are responsible.

In order to obtain a full view of the Bank's exposure to the risk, an Operational Risk Management Committee has been established.

The year 2021 was marked by the continuation of COVID-19 pandemic. The Bank monitored the development of the COVID-19 pandemic and updated, in accordance with the development of the pandemic, the Business Continuity Plan for the pandemic scenario. In 2021, the Crisis Committee continued to manage the crisis. The "remote work" model remained the primary recovery scenario and a regular way of working. The Bank also regularly monitored the financial impact of COVID-19 pandemic operational risk events and regularly reported to management through the Operational Risk Committee.

The Bank applies a simple approach to the calculation of the regulatory capital requirement for operational risk.

39. FUNDS MANAGED ON BEHALF OF THIRD PARTIES

The Bank manages funds on behalf of third parties, which consist mainly of custody services and loans provided by one legal person to another through the Bank as agent. These assets are accounted for separately from those of the Bank, and the Bank has no liability in connection with these transactions. The Bank charges a fee for these services.

At 31 December 2021, funds managed by the Bank on behalf of third parties amounted to HRK 182 million (2020: HRK 180 million). As at 31 December 2021, the total portfolio of securities of domestic and foreign clients the Bank has under custody, including domestic pension and investment funds, amounted to HRK 77,341 million (2020: HRK 68,093 million), of which HRK 5,124 million refers to Bank's subsidiaries (2020: HRK 4,624).

40. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

The fair value of financial instruments is the amount for which an asset could be exchanged or a liability settled, between knowledgeable willing parties in an arm's-length transaction. Where available, fair value is based on quoted market prices. However, market prices for a significant portion of financial instruments of the Bank are not readily available. In circumstances where quoted market prices are not readily available, fair value is estimated using alternative techniques or financial assets are measured at cost, amortised cost or indexed cost.

Valuation techniques and assumptions for the purposes of measuring fair value

The fair values of financial assets and financial liabilities are determined as follows:

- fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined by reference to quoted market prices (includes listed redeemable notes, bills of exchange, debentures and perpetual notes);
- fair values of other financial assets and financial liabilities (excluding derivative instruments) are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments;
- fair values of derivative instruments are calculated using quoted prices; where such prices are not available, a discounted cash flow analysis is performed using the applicable yield curve for the duration of the instruments for non-optional derivatives;
- interest rate swaps are measured at the present value of future cash flows estimated and discounted based on the applicable yield curves derived from quoted interest rates.

Financial instruments that are measured subsequent to initial recognition at fair value are grouped into three levels based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from the prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

	Loans: 6	Loans: 22	Level 3			

Movement of Level 3 Financial Instruments at Fair Value

The fair value level of financial instruments is determined at the beginning of each reporting period. The following table shows the reconciliation of the opening and closing amounts of Level 3 financial assets and liabilities that are carried at fair value:

Balance at 1 January 2020	83
Total gains and losses recognized in other comprehensive income	(24)
Total gains and losses recognized in profit and loss	11
Balance at 31 December 2020	70
Balance at 1 January 2021	70
Total gains and losses recognized in other comprehensive income	3
Total gains and losses recognized in profit and loss	(16)
Balance at 31 December 2021	57

Financial instruments not measured at fair value

In arriving at the fair value of these financial instruments certain assumptions, estimates and methods were used. Because of the relatively short period to maturity, the fair values of Loans and receivables from banks and Amounts due to other banks are considered not to differ significantly from their carrying amounts. For investments measured at amortized cost, corporate bonds with longer maturities are valued at quoted prices on the market or the price is derived by discounting cash flows, while for corporate bills of exchange, due to shorter maturities, it is assumed that the fair value does not differ significantly from their carrying amount. The fair values of Loans and receivables from customers and Amounts due to customers were estimated using the expected future cash flows using as the discount rate the current average market rate for identical loans and deposits. Partly recoverable and fully irrecoverable loans and receivables were not considered in measuring the fair value because their recoverable amount is assumed to reflect their fair price.

Notes to the unconsolidated financial statements (continued)

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

Because of the specific features of the credit lines provided by HBOR and their restricted transferability as well as the standardised terms and conditions HBOR applies to all commercial banks, the carrying amount of the credit lines is assumed to reflect their fair values.

41. SUBSEQUENT EVENTS

Geopolitical situation in Europe - War in Ukraine

Given the war situation in Ukraine from the end of February 2022, the Bank implemented all sanctions in accordance with the decisions and recommendations of the competent authorities of the European Union and the Bank's management increased the level and frequency of monitoring and assessing possible impacts on the Bank and bank customers.

Looking at the structure of exposures, the quality of clients and their risk profile, the Bank estimates that there is currently no increased risk of deterioration in the quality of the loan portfolio.

The bank does not have an open position in the currencies of countries affected by the war and has suspended all active limits to Russian banks.

The stability and liquidity of reserves and the capital position of the Bank are also at a high level, so the new events do not have a material impact on liquidity and the capital position.

Regarding IT risk, the Bank does not have direct business relations with countries affected by war conflicts and sanctions, and the Bank has strengthened security measures to prevent possible cyber attacks.

Taking into account all the above, the Bank's Management estimates that the new geopolitical situation does not have material risks and impact on the Bank's operations. Given the recent nature of these events and the uncertainty in which direction they will continue to develop, the Bank continuously monitors the geopolitical situation and will take appropriate measures depending on future developments.

Status changes in related companies

On 24 February 2022, the Croatian Financial Services Supervisory Agency issued a decision number UP/I 973-02/21-01/20 to OTP Leasing d.d.(which is 60% owned by OTP banka d.d.) giving approval for the status change of the merger of SB Leasing d.o.o. in liquidation.

The merged company (SB Leasing d.o.o. in liquidation which is 100% owned by OTP Leasing d.d.) transfers the entire property together with all rights and obligations, and after the entry in the Court Register it will stop to exist without liquidation. The company that takes over the entire property of the merged company and after the entry of the merger in the Court Register, becomes their legal successor (OTP Leasing d.d.). The merger will be carried out without increasing the share capital of the acquiring company and without issuing new shares of the merged company.

The acquisition is planned on 1 July 2022.

Appendix - Supplementary financial statements and reports for the Croatian National Bank

For the year ended 31 December 2021

(All amounts are expressed in millions of HRK)

Pursuant to the Accounting Act of the Republic of Croatia, the Croatian National Bank adopted a Decision on the structure and content of the Annual Financial Statements of credit institutions (Official Gazette 42/2018, 122/2020 and 119/2021 ("Decision")).

In the following tables, the financial statements are presented in accordance with the aforementioned Decision.
