You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type	FX Forward		
Term	12 months. PRIIP manufacturer is entitled to terminate the PRIIP unilaterally, if you are not complying with initial and variable margin requirements during the term of the product.		
Objectives	FX forwards are binding agreements to buy or to sell on a pre-agreed date (settlement date) a quantity of a currency (notional amount) that is pre-defined at the time of entering into the transaction at a pre-defined rate (forward rate) for the agreed lifetime based on market prices.		
	Date	1/2/2026	Forward price
	Customer sells	EUR	Customer buys
	Notional Amount	EUR 10,000	1.1874
			USD

Intended retail investor This product, FX Forward, is aimed at retail clients, who are interested in hedging and who have a short term investment horizon of less than 3 years. The FX Forward is a product for informed investor with average knowledge of and/or experience with financial products. The investor can bear losses beyond the invested amount and puts no emphasis on capital protection.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact the capacity of OTP banka dioničko društvo to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make further payments to pay for losses. **The total loss you may incur may significantly exceed the amount invested.**

This product does not include any minimum guaranteed return and you could lose some or all or even more than your investment amount.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		12 months
Example investment:		EUR 10,000 ^{***}
		If you exit after 12 months
Scenarios		
Minimum	There is no minimum guaranteed return. You could lose some or all or even more than your investment amount.	
Stress	What you might get back after costs	EUR -9,080
	Average return each year	-90.80%
Unfavourable	What you might get back after costs	EUR -2,130
	Average return each year	-21.30%
Moderate	What you might get back after costs	EUR -10
	Average return each year	-0.10%
Favourable	What you might get back after costs	EUR 2,702
	Average return each year	27.02%

The scenarios shown illustrate how your investment could perform. These scenarios are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, and include the costs of your service provider. The figures do not take into account your personal tax situation, which may also affect how much you get back. This product cannot be easily cashed in.

What happens if OTP banka dioničko društvo is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product, e.g. in the event of insolvency or an administrative order.

The product is not covered by any protection scheme. Thus, when the issuer is unable to pay out, you may not receive any amount from OTP banka d.d. under the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 12 months
Total costs	EUR 55
Cost impact (*) (**)	0.55%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.00% before costs and -0.54% after costs.

(**) This illustrates costs in relation to the notional value of the PRIIP.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The amount you pay in when entering this investment. These costs are already included in the price you pay.	EUR 55
Exit costs	We do not charge an exit fee for this product.	EUR 0
Ongoing costs		
Management fees and other administrative or operating costs	We do not charge management fees and other administrative or operating costs for this product.	EUR 0
Transaction costs	We do not charge transaction costs for this product.	EUR 0
Incidental costs taken under specific conditions		
Performance fees	We do not charge performance fees for this product.	EUR 0

^{***}The calculation is based on the notional of the contract (in this example EUR 10,000).

How long should I hold it and can I take money out early?

Recommended holding period: This product is designed to be held to the agreed 12 months date in order to match your investment requirement.

Under extreme market conditions you may not be able to cash in early, and you may have to pay significant extra costs to cash in early. It is a product to be entered into for its term that cannot be easily sold. Early termination may occur if certain events of default or other termination events occur (e.g. you are not fulfilling margin requirements), in which case early termination payments may apply. Early exit impact: If the product is terminated early, in whole or in part, an Early Termination Payment may become payable by either you or OTP banka dioničko društvo. The Early Termination Payment is linked to market parameters and could be a substantial loss or gain to you. Settlement on early termination will be specific to your FX Forward and will be influenced by a number of factors which include but are not limited to: whether it is an increasing or decreasing foreign exchange environment; the movement of the FX Spot Rate since the trade date; the amount affected by the early termination.

The Early Termination Payment amount represents the economic value of what OTP banka dioničko društvo would have paid or received if the product continued as agreed. Depending on market conditions at the time of the early termination, the settlement calculated could result in a substantial amount being due from you to OTP banka dioničko društvo.

How can I complain?

1. By sending complaint by post to the address: OTP banka d.d., Domovinskog rata 61, 21000 Split
2. By sending an email to: Treasury_Sales@otpbanka.hr
