FOMC – Dots Caught On

Ever since the sharp rise in January's average hourly earnings (AHE) which triggered the early February correction in equity markets, inflation risks and monetary tightening have attracted keen investor attention. Even after January's AHE were revised down and February's undershot expectations, the market consensus was 100% in favour of a 25 basis points (bp) increase in the Fed's key rates at this Wednesday's meeting. No surprise then that rates were duly hiked by 25bp. Given the lack of uncertainty on what the Fed would do, market attention was focused on 1) whether Fed projections would signal a faster pace for rate hikes and 2) how the new Chair Jerome Powell would perform.

1. On the first point, the key focus has become the “dot plot”, i.e. the graphic representation of participants' assessments of where rates should be at the 2018 to 2020 year-ends. The median dot for end-2018 was unchanged at 2.125%, suggesting two further hikes this year, although it would take only one upgrade to shift the median projection to three. However, the median did move higher for both 2019 and 2020, signaling seven 25bp hikes in total, three next year and two in 2020 in addition to those planned this year. The Federal Open Market Committee's economic projections were also adjusted – growth was revised higher for this year and next, unemployment revised lower for the next three years and core PCE (the Fed's preferred inflation gauge) unchanged this year but revised up from 2.0% to 2.1% for both 2019 and 2020.
2. On the second, Mr Powell appears to have reassured those investors who feared that he would signal a radical change in the Fed's direction. The FOMC statement reads as well balanced – although rates did rise, the policy stance “remains accommodative”; while market expectations of inflation have increased, they “remain low”. In addition, he remarked during the Q&A that he would not place too much faith in the 2020 projections, implying that the market should also take them with a pinch of salt.

So, the overall impression from yesterday's much-awaited meeting is mixed. A more constructive economic scenario contrasts with only modest inflationary pressure. Upward moves in the dots still leave the Fed's trajectory for this year exactly where Janet Yellen left it. As a result, the Fed gives little impression of being worried by rising prices, helping explain the ensuing dollar weakness.

Bottom line. We still expect two further hikes this year, bringing the total to three – a fourth could come if the Fed changes its view on tax-cut-fuelled overheating. Even if the pace of tightening were to quicken, rates would still remain well below the 4.2% suggested by the Taylor Rule over the next couple of years. Strengthening growth, modestly higher inflation and still accommodative monetary policy – not a bad combination for the US economy.

Market News

EUROZONE

Eurozone consumer confidence remained at an 18-year high. In other words, a recession is unlikely in the short term.

For the third consecutive month, manufacturing confidence declined, falling from 58.6 to 56.6 in March against expectations for a small correction to 58.2. Similarly, services confidence fell from 56.2 to 55 in March. Both remain robust nonetheless.

This week's key events

		Period	Prev.	Cons.
27 Mar	Consumer confidence	Mar	0.1	0.1
27 Mar	Business climate indicator	Mar	1.48	1.4

UNITED KINGDOM

The Bank of England left rates unchanged as February consumer prices eased down from the November peak to +2.7% YoY.

Retail sales were slightly above expectations, remaining stable at +1.5% YoY in February.

After a small increase in January, UK unemployment returned to a 40-year low of 4.3% in February.

This week's key events

		Period	Prev.	Cons.
29 Mar	GDP, final (% YoY)	Q4	1.4	1.4
29 Mar	Current account balance	Q4	-23bn	-24bn

UNITED STATES

Last Wednesday, the US Federal Reserve hiked its target rate for the first time this year, as widely expected. The analysts surveyed by Bloomberg expect another two rate hikes this year with a probability of 72%.

The University of Michigan consumer sentiment rose for the second month in a row to a 14-year high of 102.

Industrial production rose 1.1% in February. Similarly, manufacturing confidence edged up from 55.3 to 55.7 in March.

Initial jobless claims rose from 226k to 229k over the past week. However, the labour market is close to full employment with the jobless rate at a 17-year low of 4.1%.

This week's key events

GLOSSARY

Accommodative Monetary Policy: when a central bank attempts to expand the overall money supply to boost the economy when growth is slowing by lowering the interest rate or by purchasing Treasury bonds.

Basis Points: A unit that is equal to 1/ 100th of 1% and used to denote the change in a financial instrument.

Bear: an investor who believes, for any technical or fundamental reason, that a security or the broader market will decline significantly. A bear takes the appropriate steps to limit losses during the period that they believe that the security will decline.

Ibovespa Index: The Ibovespa Index is a gross total return index weighted by traded volume & is comprised of the most liquid stocks traded on the Sao Paulo Stock Exchange.

BoC: Central Bank of Canada

BoE: Central Bank of England

BoJ: Central Bank of Japan

CPI (Consumer Price Index): measures changes in the price level of a market basket of consumer goods and services purchased by households.

Credit risk: credit risk is the chance that a bond issuer will not make the coupon payments or principal repayment to its bondholders. In other words, it is the chance the issuer will default.

Deflation: a general decline in prices, often caused by a reduction in the supply of money or credit. Deflation can be caused also by a decrease in government, personal or investment spending.

EPS (Earnings Per Share): the portion of a company's profit allocated to each outstanding share of common stock. Earnings per share serves as an indicator of a company's profitability.

ECB (European Central Bank): created in 1998, the European Central Bank determines the monetary policy to be adopted within the Eurozone. To do so, it has various means, in particular the key interest rates. The ECB is responsible for the single currency. Its main mission consists of maintaining price stability within the Euro zone.

EM/ EC (Emerging markets/ countries): markets/ countries in the process of rapid growth and industrialization.

Equity Risk Premium: The excess return that an individual stock or the overall stock market provides over a risk-free rate.

Eurostoxx50: A market capitalization-weighted stock index of 50 large, blue-chip European companies operating within eurozone nations.

Fed (Federal Reserve): central bank of the United States and controls the money supply.

FOMC (Federal Open Market Committee): The branch of the Federal Reserve Board that determines the direction of monetary policy.

Guaranteed capital: on maturity, a capital-guaranteed structured product repays a minimum 100% of the capital invested on expiry. However, the investor bears the risk associated with the issuer of a structured product. If the issuer defaults, there is a risk of loss of capital.

Hang Seng index (Hong-Kong Index): A market capitalization-weighted index of 40 of the largest companies that trade on the Hong Kong Exchange. The index aims to capture the leadership of the Hong Kong exchange, and covers approximately 65% of its total market capitalization.

Investment-grade bonds: a rating that indicates that a municipal or corporate bond has a relatively low risk of default.

ISM Manufacturing Index: monitors employment, production inventories, new orders and supplier deliveries.

Issuer: in the case of a structured product, an issuer is an entity that issues and distributes investment products. An issuer may be a bank or a company created specifically for this purpose. In the case of a bond, an issuer is an entity (government, company, government agency etc.) that issues bonds and borrows the amounts required for its financing.

Long/ Short Strategy: An investing strategy of taking long positions in stocks that are expected to appreciate and short positions in stocks that are expected to decline.

Maturity date: in finance, maturity or maturity date refers to the final payment date of a loan or other financial instrument, at which point the principal (and all remaining interest) is due to be paid. The term fixed maturity is applicable to any form of financial instrument under which the loan is due to be repaid on a fixed date.

MSCI World Index: index designed to provide a broad measure of equity-market performance throughout the world. The Index is maintained by Morgan Stanley Capital International, and is comprised of stocks from both developed and emerging markets.

Overweight: An analyst's opinion regarding the future performance of a security. Overweight will usually signify that the security is expected to outperform either its industry, sector or, even, the market altogether.

P/B Value (Price/ Book value): a ratio used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

P/E ratio (Price/Earning ratio): the ratio [Share price/earnings per share] reflects the trading price of a share in relation to the expected earnings. As such, the higher this ratio, the more expensive the stock, and vice versa. Note: the P/E ratio also depends on profit growth; companies with high profit growth tend to have a higher P/E.

PMI composite : composite of five of the survey indices. These are New orders, Output, Employment, Suppliers' delivery times (inverted) and Stocks of purchases

PMI (Purchasing Managers Index): Economic indicator of the manufacturing sector.

Protected capital: a product with protected capital does not guarantee the repayment of all the capital invested on maturity. The main risk associated with this type of product is a risk of capital loss, linked to fluctuations in the capital markets. There is a risk part or all of the capital may not be returned, depending on the type of protection.

QE (Quantative Easing): An unconventional monetary policy in which a central bank purchases government securities or other securities from the market in order to lower interest rates and increase the money supply.

Quarterly Earnings Report: A quarterly filing made by public companies to report their performance. Included in earnings reports are items such as net income, earnings per share, earnings from continuing operations and net sales. These reports follow the end of each quarter. Most companies file in January, April, July and October.

S&P500 (SPX Index): An index of 500 stocks chosen for market size, liquidity and industry grouping, among other factors. The S&P 500 is designed to be a leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large cap universe.

Structured product: structured products are investment solutions comprised of a number of financial instruments. They combine one or more financial assets such as equities, currencies, interest rates etc. with a more sophisticated options component.

Topix stock index: an index that measures stock prices on the Tokyo Stock Exchange (TSE).

Underweight: An analyst's opinion regarding the future performance of a security. Underweight will usually mean that the security is expected to underperform either its industry, sector, or even the market altogether.

US Dollar Index (DXY): A measure of the value of the U.S. dollar relative to majority of its most significant trading partners.

Valuation: the process of determining the current worth of an asset or company.

Valuation metric: assessment method to determine the valuation of an asset such as the P/E for equities.

Volatility: volatility is a measure for variation of price of a financial instrument over time.

EXPLANATION OF RISK LEVELS

For example, risk level R1 corresponds to a defensive risk profile. These indicators are based on the 1-year 95% Value at Risk (VaR). VaR is a measurement of the maximum amount a portfolio could lose under normal market conditions over a given period with a given probability. If the 1-year 95% VaR amounts to x%, this means that there is a 95% probability that the portfolio will not lose more than x% of its value in one year.

Risk classification	0 Lowest Risk	1 Low Risk	2 Medium Risk	3 High Risk	4 - Highest Risk
Loss	There is a 95% probability that the product will not depreciate in value in one year.	There is a 95% probability that the product will not lose more than 5% of its value in one year.	There is a 95% probability that the product will not lose more than 15% of its value in one year.	There is a 95% probability that the product will not lose more than 30% of its value in one year.	There is a minimum of 5% probability that the product will lose more than 30% of its value in one year.

This document, subject to modifications, is given for purely informative purposes and does not constitute a contract and should be treated as a marketing communication providing general investment overview, investment opportunities and strategies. The information contained in this document is given for information purposes only. Capitalised terms refer to the glossary attached to this document.

This document was prepared by Splitska Banka Private Banking division, a division within Splitska banka d.d. Because of the fact that this document is given for information purposes only, Croatian Financial Services Supervisory Agency (HANFA) as supervisory body Splitska bankad.d. did not approve this document and has no control over the content of it and it is not fully compliant with regulatory provisions that could be considered as investment advice in any way. The contents of this document are not intended to provide an investment service or an investment advice, and the document does not constitute and under no circumstances should it be considered in whole or in part as an offer, a solicitation, advice, a personal recommendation, or an invitation to make an offer or purchase, subscribe for or sell financial products referred to herein, or an invitation to invest in the class of assets mentioned herein from Splitska Banka Private Banking division or Splitska bankad.d. The information indicated in this document shall not to be considered as legal or fiscal or accounting advice. Some products described herein may not be suitable for all investors, and can present various risks, or result in a potential loss of the total invested amount, including a potential unlimited loss, and accordingly are reserved only for a certain category of investors, and/or adapted to investors who are sophisticated and familiar with these types of product(s) and understand the investment and the associated risks. No investment decision whatsoever may solely result from reading this document. Accordingly, before making an investment decision, each potential investor will be questioned by Splitska Banka Private Banking division at Splitska bankad.d. to determine his eligibility to subscribe for the envisaged product, and the compatibility of the investment with his investment profile and objectives. He should also consult his own independent financial, legal and tax advisers to obtain all the financial, legal and fiscal information which will allow him to appraise the characteristics and the risks of the envisaged product, as well as his fiscal treatment, in light of his own circumstances. The reader is warned that the placement of stock exchange orders requires full knowledge of the regulations and operation of the markets. Before investing, the reader must be aware of the rapid fluctuations that may occur on certain markets and their speculative nature or their lack of liquidity. It is possible that certain assets or categories of assets mentioned in the document are not appropriate investments for the reader. In certain cases, the investment made includes even an undeterminable high risk of loss that could exceed the initial investment. The full understanding and agreement to the related contractual and informative documentation including the documentation relating to the relevant risks is required from the potential investor prior to the subscription of any product(s) any investment. Neither Splitska bankad.d. nor Splitska Banka Private Banking division shall be held responsible for any consequences, including financial consequences, resulting from your investments in and/or your instructions in relation to investments in financial product(s) concluded on the basis of this document alone. This document is not intended to be distributed to a person or in a jurisdiction where such distribution would be restricted or illegal. It is the responsibility of any person in possession of this document to inform themselves of and to observe all applicable laws and regulations of relevant jurisdictions. This document is in no way intended to be distributed in or into the United States and the financial products referred to herein cannot be distributed or sold directly or indirectly in or into the United States or to any US person.

Any investment may have tax consequences and it is important to bear in mind that neither Splitska bankad.d. nor Splitska Banka Private Banking division provide any tax or legal advice. The level of taxation depends on individual circumstances and such levels and bases of taxation can change.

The communicated information is only relevant in value at the time at which it was drafted. The price and value of investments and the

income derived from them can go down as well as up. Changes in inflation, interest rates and the rate of exchange may have an adverse effect on the value, price and income of investments issued in a different currency from yours. The simulations and examples included in this document are provided only for indicative and illustration purposes and may vary depending on the market fluctuations and the information and views reflected in this document may change. Splitska bankad.d. and Splitska Banka Private Banking division disclaim any responsibility to update or make any revisions to this document. The historical data and information herein, including any quoted expression of opinion, have been obtained from, or are based upon, external sources that Splitska bankad.d. and Splitska Banka Private Banking division consider to be reliable but have not been independently verified and are not guaranteed as to their accuracy or completeness. Neither Splitska bankad.d. nor Splitska Banka Private Banking division shall be liable for the accuracy, relevance or exhaustiveness of this information. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realised, and should not be deemed an assurance or guarantee as to the expected results of transaction(s) involving such investment product(s)/ asset class (es).
